

Transportation Engineering Training Program (TETP)

## TETP News and Events Update

### Upcoming Courses:

Work Hour Estimating eLearning Prerequisite Course now available through the LMS!

#### October 26-27 - CDOT Lighting Design

The Lighting Design for CDOT Projects course emphasizes quality lighting for motorists by encouraging effective lighting methods and designing for optimal visibility, minimizing glare, increasing uniformity and reducing light pollution. By the end of the course, Traffic, Design and Project Engineers will be able to identify highway lighting methods and understand lighting design concepts, guidelines, state law, standards and specifications that are critical to successfully develop lighting plans for transportation projects.

#### Course instructor:

Nancy Clanton, PE, FIES, IALD, LEED Fellow / Clanton & Associates.

#### Class Location:

The MH Companies, 1044 Speer Boulevard, Denver CO
