GUNNISON VALLEY
Coordinated Public Transit & Human Services Transportation Plan

Adopted October 2020

Photo Credit: Jeff Prillwitz
The Gunnison Valley (GV) Transportation Planning Region (TPR) includes Delta, Gunnison, Hinsdale, Montrose, Ouray, and San Miguel Counties. The Region includes more than 40 incorporated towns and cities, with a few of the largest towns and cities being Delta, Gunnison, Montrose, and Telluride. Public transit and human services transportation play an integral role in the Region’s multimodal transportation network by providing mobility and promoting personal independence to residents in the Region. Transit improves quality of life and supports public health by providing access to jobs, schools, shopping, food, medical care, senior centers, social services, and recreation in the Region while also providing connectivity to goods and services in nearby major activity centers.

Every four to five years, Colorado Department of Transportation (CDOT), in coordination with regional planning partners, updates regional transit plans in all rural regions of the state. This Plan serves as the Coordinated Public Transit and Human Services Transportation Plan for the GV TPR and establishes a framework for creating an integrated statewide transit system that meets the mobility needs of Coloradans. CDOT’s Division of Transit and Rail (DTR), in coordination with the GV TPR members and transit agencies, took input from the general public to develop this Plan in accordance with all CDOT and Federal Transit Administration (FTA) planning requirements. The TPR will use this Plan to prioritize transit investments and work toward the long-term implementation of the Region’s unique transit vision and goals.

**GV Transit Vision**

The GV TPR will accommodate the Region’s existing and future multimodal transportation needs by maintaining a safe, convenient, reliable, and efficient transportation network that supports the economic growth of the Region by providing transportation choice for residents, visitors, and tourists.

**GV Transit Goals**

1. Provide mobility to the traveling public at an acceptable level of service
2. Preserve and enhance the Region’s overall economic health, providing for energy development and freight movement reliability
3. Maintain the transportation system in the most efficient manner possible
4. Provide new integrated intermodal access and mobility options with an emphasis on developing new bike and transit travel options
5. Preserve, maintain, and enhance existing transit services
6. Provide additional general public transit service within and between communities
7. Improve and promote transportation options
8. Increase transit funding through public and private mechanisms
9. Integrate general public and human services transit
10. Design the transportation system to fit the existing urban and natural context, minimizing impacts to the Region’s air, water, scenic view corridors, cultural resources, and wildlife habitat
11. Support the transportation system to function as a complete system with effective connectivity both within the Region and to the rest of the state
12. Embrace new technology as it becomes available
13. Leverage the existing transportation network to support emergency response effort
Transportation - whether walking, biking, taking transit, vanpooling, carpooling, or driving a car - is a critical element of everyone's daily life and well-being. Providing access to safe and reliable transportation for all, regardless of who they are or where they come from, results in the creation of accessible and inclusive communities, healthier lifestyle choices, and improved economic prosperity.

When considering the GV TPR’s mobility future, reviewing and analyzing available data helps uncover potential gaps and needs in the transportation network. Populations that often have a higher than average need for transit and/or have limited access to transportation services and facilities include:

- Older adults (65+)
- People with disabilities
- Communities of color
- Low-income residents
- People with limited English proficiency
- Households without a car

Equality vs. Equity of Colorado’s Transportation Network

Colorado’s statewide transit planning efforts consider the needs of all people - not only from an equality perspective, but also through the lens of equity. An equitable transportation network offers convenient and affordable access to jobs, medical services, education, grocery shopping, and social/recreational activities. Access results in opportunities that can often positively influence personal health and quality of life.

Equality

When everyone is treated the same

Equity

When everyone is given what they need to be successful

GV TPR Historically Underrepresented Populations

Population & Employment Projections through 2045

Where People Travel to Work (by County)

Identified Transit Needs

CDOT conducted a comprehensive stakeholder and public engagement effort to gather input from elected officials, stakeholders, and community members about transportation needs - including transit and human services transportation - in the GV TPR through one-on-one meetings, online surveys, participation in community events, and small group meetings. The highest priority transit trends and issues that emerged from this outreach included:

- Interest in passenger rail: 12%
- Need for additional transportation options: 27%
- Interest in expansion of existing bus services: 23%
- Desire to accommodate the travel needs of historically underrepresented populations: 18%
- Interest in transit supportive infrastructure improvements: 15%
- Concerns over lack of transit funding: 5%

Source: 2019 Your Transportation Plan Public Input

Your Transportation Plan online survey respondents were asked to identify how much they value five potential multimodal transportation strategies that could help improve travel options in the GV TPR.

**Preferred Travel Option Improvement Strategies:**

1. **Enhance local & regional transit**
2. **Expand intercity transit**
3. **Expand the bicycle & pedestrian network**
4. **Provide multimodal hubs/connections**
5. **Improve travel time reliability**

In fall 2019, a survey was distributed to transit and human services agencies in the GV TPR. One of the survey questions asked providers what improvements are most needed in the Region. As shown below, GV TPR providers indicated that increasing service frequency and span of service are the most desired improvements.

- Increase service frequency
- Increase span of service
- Increase service coverage
- Provide transit access improvements
- Update or provide new infrastructure
- Update or provide new technology
- Increase specialized transportation services

Source: 2019 Statewide Transit Plan Provider Survey
2019 Statewide Transportation Survey of Older Adults and Adults with Disabilities

In 2014, CDOT conducted its first ever statistically valid statewide survey of older adults and adults with disabilities to learn about specific travel behavior and transportation needs of these populations and their preferences and priorities. The survey was conducted again in 2019 to understand changes and trends of these populations over time. Several barriers including inadequate service coverage, difficulty finding service information, and high fares were ranked lower than the previous 2014 survey. However, difficulty finding transportation for work and medical appointments increased significantly since 2014. The findings from the 2019 survey relevant to the GV TPR are found below.

Barriers to Using Public Transportation Services

The most common barrier identified in the GV TPR related to public transportation was coverage of existing services. Other common barriers included insufficient frequency of service and span of service. Barriers such as unsafe streets, distance to stops/stations, expensive fares, and travel time were ranked well below the state average.

Do you ever have trouble finding transportation for trips you want or need to make?

Compared to the statewide average, the GV TPR survey respondents had a higher proportion of people who said they never have trouble finding transportation for trips. All other results were ranked lower than the statewide findings.

For what types of trips do you need transportation but have trouble finding transportation?

The GV TPR survey respondents said they have the most trouble finding transportation for medical appointments, work, and shopping/pharmacy trips. All other trip types were ranked lower than the statewide average.

- Specialized Services
- Vanpool
- Aerial Tramway
- Deviated Fixed-Route

Definitions

- Transit Service Types
  - Fixed-route: Transit service that operates on a defined route and schedule.
  - Deviated Fixed-Route: Transit service that follows a defined route but schedule may deviate off route within a defined area to pick up passengers upon request.
  - Door-to-Door: Typically door-to-door service where you call ahead to schedule a trip (e.g., Dial-a-Ride, Call-n-Ride, Access-a-Ride).
  - Vanpool: Service that is organized in advance by a group of people who travel to and from similar locations at the same time.

- Transit Service Categories
  - Interregional Public: Open to the general public and connects one region/TPR of the state to another region/TPR.
  - Regional Transit Service: Open to the general public and connects communities and counties within a region/TPR.
  - Local Transit: Open to the general public and operates primarily within a city, town, or community.
  - Human Services Transportation: Service provided by a human services agency that is typically for a specific population, such as older adults, people with disabilities, and veterans.
  - Private For-Profit Transportation: Services that are operated privately and can include taxis, resort transportation, ridehailing services (Uber, Lyft), etc.

- GUNNISON VALLEY

Existing Providers & Coordination Activities

All transit service provider information and associated data for the GV TPR was collected from the 2019 Statewide Transit Plan Provider Survey, National Transit Database, previous plans, CDOT’s Division of Transit and Rail, and internet research. While extensive efforts were made to collect information about all providers, the information may not be comprehensive.

Bustang Outrider

Bustang, CDOT’s interregional express bus service, is funded by CDOT and operated by a local provider. Two Bustang Outrider routes serve the GV TPR.

Gunnison-Denver Outrider Route - Connects the GV TPR to the Greater Denver Area through the San Luis Valley and Central Front Range TPRs. Gunnison is the only stop within the GV TPR on this route. Monarch Mountain serves as an additional seasonal stop during the winter recreation period. The route is operated by Alpine Express.

Gunnison Valley stop: Gunnison, Monarch Mountain (seasonal stop)

Durango-Grand Junction Outrider Route - Connects the GV TPR with the Southwest TPR – Durango-Grand Junction Outrider Route. Additionally, rides are also offered between Montrose and Delta and from Montrose, Olathe, Delta to Grand Junction. All interregional transit is pre-scheduled on the dial-a-ride service.

Gunnison Valley stop: Telluride, Placerville, Ridgway, Montrose, and Delta

Interregional Public Transit

San Miguel Authority for Regional Transportation (SMART)

Operates an interregional route that connects Telluride and Rico.

Gunnison Valley stop: Telluride

Town of Mountain Village

Operates a commuter shuttle for town employees and non-town employees who live outside the town. Three routes are offered; service connecting Mountain Village and Cortez is the only interregional route provided.

All Points Transit

Operates a route twice monthly between Montrose and Grand Junction that is appointment based. Also provides service from the West End of Montrose County to the City of Montrose and Grand Junction. Additionally, rides are also offered between Montrose and Delta and from Montrose, Olathe, Delta to Grand Junction. All interregional transit is pre-scheduled on the dial-a-ride service.

Tri-County Health Network

TCHN contracts with All Points Transit to operate a regional medical shuttle.

PAGE 10
Five-year historic trends for key transit operating metrics (ridership, revenue miles, and revenue hours) for GV demand response, fixed-route, and aerial tramway services show overall growth from 2014-2018. Ridership increased by over 30 percent during this period. SMART performance data is not included in the data below as service did not begin until November 2018.

### Key Performance Data

- **Annual Ridership**: $3,303,379 to $4,361,256
- **Vehicle Revenue Miles**: $4,262,217 to $5,425,421
- **Vehicle Revenue Hours**: $355,082 to $452,264

### Key Performance Metrics

- **Cost/Revenue Hour**: $560.94 to $305.36
- **Cost/Revenue Mile**: $16.15 to $13.82
- **Cost/Trip**: $5.65 to $5.75

###Annual Operating Costs

- **Demand Response**: $846,647
- **Fixed-Route Transit**: $1,120,884
- **Aerial Tramway**: $854,709

###Key Performance Metrics

- **Ridership & Operating Cost**
- **Cost/Revenue Hour**: $39.37
- **Cost/Revenue Mile**: $12.11
- **Ridership Cost**: $3,286,431

---

Human Services Transportation Providers

Several human services agencies operate transportation services in the GV TPR; however, for many of these providers, transportation is only one of the services they provide. The table below identifies human services agencies in the Region that provide transportation services and the populations they serve. The list below is limited to those that responded to the 2019 Statewide Transit Plan Provider Survey and may not be comprehensive.

- Contract with other Providers
- Fixed-Route Bus

Other Human Services Providers

Other human services providers may not offer transportation services but may offer transportation related services, fund transportation programs, or coordinate with transportation providers in the Region. Human services providers in the Region that responded to the 2019 Statewide Transit Provider Survey include Delta County Department of Human Services, Delta Workforce Center, Montrose County Human Services, and Region 10.

Private Transportation Providers

The GV TPR has a range of private, for-profit transportation providers. The existing known providers include several airport shuttles like Telluride Express, Mountain Limo, Alpine Express, Telluride Car Service (taxi service also offered), and Rocky Rides. Ridehailing services like Uber and Lyft are also available in the Region. Western Slope Rides offers transportation to events, outdoor activities, and airports. Sunshine Rides provides Medicaid-related transportation trips.

State of Good Repair Data

CDOT’s DTR comprehensive Transit Asset Management Plan meets federal requirements and was last updated in fall 2018. The Plan identifies the condition of assets funded with state or federal funds to guide optimal prioritization of investments to keep transit systems in Colorado in a state of good repair. Currently, 25 percent of CDOT tracked transit vehicles in the GV TPR are beyond their state of good repair.

Regional Coordination Activities

Coordination of transportation services, funding sources, information, vehicles, and equipment is paramount when looking for ways to minimize service duplication, create more efficient and productive systems, and provide trips to as many people as possible. A variety of existing coordination activities are occurring between transit providers and human services agencies in the GV TPR. The 2019 Statewide Transit Plan Provider Survey gathered information from providers in the GV TPR about coordination to better understand current activities and identify barriers.

Current Coordination Activities

- Coordinate services/schedules
- Regularly communicate with partners
- Participate in local/regional coordinating council
- Referring clients
- Share other transportation resources (vehicles, dispatch, etc.)
- No coordination

Barriers to Coordination Activities

- Lack of funding
- No current barriers
- Distance to other providers is too great
- Funding regulations/limitations
- Technology limitations
- Lack of an organized transportation coordinating council or equivalent

Source: 2019 Statewide Transit Plan Provider Survey
The Three Rivers Regional Transit Coordinating Council (3RRTCC) was established in the GV TPR in 2011 to review transit plans, projects, and proposals, and to approve budgets. This includes expenses and funding sources for planning and implementing projects. The 3RRTCC meets quarterly, or as necessary, to work on strategic coordination within the TPR and to assist in providing transportation information and services to residents, employees, and visitors.

Delta County Department of Human Services (DHS), All Points Transit, Gunnison Valley RTA, Mountain Express, SMART, and the Town of Mountain Village all reported that they regularly participate in their regional and/or local coordinating councils.

The 3RCC currently does not have a mobility manager representing the Region. However, there are efforts to provide joint marketing and information sharing. Information about transportation options in the TPR are publicly available on the Region 10 League for Economic Assistance and Planning website. The website includes a variety of transportation resources, including a list of all public transit providers, private transit providers, and services for older adults, people with disabilities, and veterans.

All Points Transit has a mobility manager tasked with coordinating services, providing travel training for local residents to learn how to use the transit system, and operating a centralized call center that provides reservation services for Delta, Montrose, and portions of San Miguel Counties.

DHS, Neighbor to Neighbor, All Points Transit, Gunnison Valley RTA, Mountain Express, SMART, and the Town of Telluride all reported coordinating their services and schedules with other providers. All Points Transit provides scheduling and dispatch services for the Disabled American Veterans local and regional routes.

The Gunnison Valley RTA and Mountain Express provide a combined winter service to the subdivision of CB South, located 8 miles south of the Town of Crested Butte. Neither the Gunnison Valley RTA, nor Mountain Express has sufficient resources to provide this service on its own. In spring 2015, the Gunnison Valley RTA initiated service to the subdivision by routing all of its northbound and southbound vehicles off Hwy 135 to the new bus stop built at Red Mountain Park. This service is not offered during the winter season due to passenger capacity constraints on vehicles. Mountain Express provides peak season service, which means that the subdivision is served year-round.

All Points Transit, Community Options, Delta County DHS, Delta Workforce Center, and Montrose County Human Services all reported that they refer clients to other providers in the Region.

Transit funding is complex and Colorado providers typically use a patchwork funding approach that includes federal, state, local fares, donations, and/or tax revenues. Public funds are primarily used to support transit and transportation services in rural parts of Colorado, with most agencies relying on federal funds from the FTA. Based on 2014-2018 budget data, most of the GV TPR’s capital revenues and nearly half of its operating revenues were from federal sources. Operating revenues were supplemented by state and local funds, from fares, and from donations and partnerships.

The chart below shows five-year GV TPR operating and capital funding trends. Operating funds increased by nearly 50 percent since 2014. The addition of new services in the Region, including SMART, has increased operating and capital revenues.

Additional capital and operating projects were identified by GV TPR participants, transportation providers, CDOT staff, and other key transit stakeholders throughout the Region. Project needs identified do not include any anticipated fleet replacement funds needed to maintain all assets in a state of good repair. See pages 22 and 23 for the full list of additional project needs.

Capital Project Needs: $169.6M
Operational Project Needs: $59.0M
Total Identified Need: $228.5M
Regional Transit Revenue Trends

Annual Operating/Capital Projections

Annual operating and capital funding projections for the GV TPR provide a framework for planning for transit in the future. However, while planning projections are informative, they are in no way predictions of the future. Many factors influence revenue projections, including: (1) availability and allocation of federal, state, and local funds; (2) economic volatility; and (3) the rate of inflation. To provide a foundation for future planning, annual operating and capital projections for the GV TPR were developed based on 2018 National Transit Database data and survey responses from the 2019 Statewide Transit Plan Provider Survey.

Scenario 1: Maintain the Status Quo

Projected Surpluses/Deficits 2020-2045

Scenario 2: Maintain the Status Quo + New State Funding

Projected Surpluses/Deficits 2020-2045

Historically, limited funding for operating and capital transit needs has been available. In 2017, the state legislature approved Senate Bill 267 (SB-267), which allocates $500 million in general funds for each of four years to address transportation needs. SB-267 mandates that at least 10 percent, or $50 million, is allocated to transit capital projects annually. Twenty-five percent of the SB-267 transit funds are allocated to CDOT projects, including Bustang; approximately 50 percent of funds are allocated to local agency transit improvement projects. SB-267 is only a four-year program; for the funding to continue, the state legislature would have to approve such legislation.

Given the limited state funding for transit, many transit agencies in the state rely heavily on local funds to support their service, especially operating dollars. Alternative funding sources to support transit services locally and regionally include:

- General funds
- Lodging taxes
- Parking fees
- Property taxes
- Public-private partnerships
- Rural transportation authorities
- Sales and use taxes
- Sponsorship/donations
- Tourism taxes
- Utility taxes/fees
- Vehicle fees

Federal Transit Administration Funding Programs

- Accelerating Innovative Mobility - 5310
- Access and Mobility Partnerships - 5310
- Bus and Bus Facilities Discretionary Program - 5339(b)
- Capital Investment Grant - 5309

- Technical Assistance & Standards Development - 5314(a)
Implementation Strategies

Implementation actions are meant to be near-term, practicable measures related to the TPR’s transit vision and goals and to support the implementation of identified transit projects in the Region.

- Advocate for stable funding to maintain the operation of existing transit services
- Advocate for full funding of TPR identified transit capital, operating, and planning projects (see project list on pages 22-23)
- Maintain all assets in a state of good repair
- Maximize existing and seek new funding sources to expand local and regional services to include additional days, hours, and geographic coverage
- Improve transit amenities in the Region, through increased signage and shelters, and more inclusive street design
- Consider ways to integrate transit and improve access to transit along main streets for residents, employees, and visitors
- Implement mobility hubs to provide accessible, multimodal transportation connectivity between park-and-rides, bicycle trails, pedestrian connections, and regional and local services
- Establish interregional transit service between Gunnison and Montrose and ensure transfer opportunities to Bustang Outrider service between Durango and Grand Junction
- Expand interregional transit service between Telluride and Grand Junction, and provide intermediate stops in Ouray, Montrose, and Delta
- Ensure the coordinating council has adequate resources and funding needed to hire a permanent mobility manager, explore joint strategies, and maximize partnership opportunities
- Enhance commuter transit services between Delta/Montrose and Telluride for service and resort employees

Priority Projects

Based on findings from public input, data about gaps and needs, and input from stakeholders, GV TPR members prioritized their operating and capital projects for the Region. If projects were added after the TPR prioritization process, those projects are identified as “unranked.” It is important to note that while projects are ranked, priorities may change based on available funding, grant opportunities, agency needs, etc.
