

THANK YOU FOR ATTENDING!

Welcome to the second and final public meeting for the I-25 and Arapahoe Road Interchange Reconstruction project. The 90% final design milestone has recently been reached. The project team needs your input as the design wraps up and the project moves forward into construction.

Stations are located around the room, organized to present the following information:

- Planned Improvements
- Impacts and Mitigation
- Walnut Hills Noise Walls
- Aesthetics
- Construction Phasing
- Schedule

AGENDA

Open House 4:30 - 7:00 PM

*There will be no formal presentation.
Please view exhibits at your own pace, and discuss the project with project team members.*

PROJECT UPDATE

When will construction begin?

Utility relocations will be conducted by utility companies and will begin this year. At this time, construction is anticipated to begin for the roadway and interchange project in April 2016 and be substantially completed by December 2017. Construction phasing time frames by location and planned detour and closure routes are displayed at this meeting.

Will overhead utilities be buried?

Undergrounding of the overhead electric lines along the south side of Arapahoe Road, from west of I-25 to Uinta Street, and along Yosemite Street from Arapahoe Road to Xanthia Street is planned. This also includes undergrounding the feeder lines to each home adjacent to the planned noise walls. Meetings with each homeowner and tenant adjacent to the noise walls are needed to discuss specifics. Those individuals are asked to contact Leah Langerman (llangerman@deainc.com) to schedule the site visit.
