Date: November 15, 2013

Question:

Under section 3.2.1 Submitter Experience of the Request for Qualifications, it states “Describe the experience, up to a maximum of four projects”, is this a maximum of four projects for the entire submitting team total or can we submit a maximum of four projects for each of the major participants of the submitting team?

Answer:

The intent of information submitted as Form B is to identify project experience that best describes the Proposers’ skill and capability as it relates to this project. The maximum of four projects includes the Proposer and Major Participant total. We will review no greater than four projects.

Question:

Who will be the final plan review and approval authority for the design of the FFSS?

Answer:

The responsibility for final plan review rests with CDOT. The CDOT Project Team will review/Accept/Approve the plans. In respect to the Authority Having Jurisdiction (AHJ), CDOT is the AHJ at the Eisenhower/Johnson Memorial Tunnel complex.
