- 12. Other Changes, Additions, or Observations:** Currently the City of Aspen is adding ADA accessible corner ramps to intersections in this area.
- 13. National Register Eligibility Assessment:**
Eligible Not eligible Need data
Explain: The 2006 Survey found the Taylor House to be eligible to the NRHP. The Taylor House is NRHP eligible under Criterion C for its stunning Shingle-style with distinctive identifying features that include wall cladding of continuous shingles, asymmetrical façade with irregular, steeply-pitched roof line, and a full-width, shingle-clad porch. The two-and-one-half-story house has a hipped roof with cross gables and both front and side-elevation bay windows. It was built in 1888 for F.M. Taylor, a successful mining entrepreneur and co-owner of Taylor and Brunton Sampling Works Company, during Aspen's booming silver mining era. This building is also contributing to the Main Street HD, which was determined Officially Eligible in 2006.
- 14. Management Recommendations:** CDOT recommends that the SH 82 Entrance to Aspen project follow mitigation measures as outlined in the ROD during improvements to Main Street HD. The improvements will be within the right-of-way, which will not impact the resource. However, when and if the LRT is constructed, SHPO and the Aspen Historic Preservation Commission should review the design drawings for the LRT overhead lines and medians in its vicinity. This is outlined in the ROD as part of the mitigation.
- 15. Photograph Types and Numbers:** Digital photograph attached.
- 16. Artifact and Field Documentation Storage Location:** Bunyak Research Associates
- 17. Report Title:** CDOT Project STA 082A-080 SH 82 Entrance to Aspen Reevaluation Report for CDOT Region 3, 2006
- 18. Recorder(s):** Dawn Bunyak, Historian **19. Date(s):** August 18, 2006
- 20. Recorder Affiliation:** Bunyak Research Associates 10628 W Roxbury Ave, Littleton, CO 80127
