

US 6 Bridges Design Build Project

RECORD OF DECISION & ENVIRONMENTAL IMPACT STATEMENT

Valley Highway EIS Phasing

US 6 Design Build Project Elements

FEIS [2006] + ROD [2007]

Elements Under Construction

- Reconstruction of the I-25 / Santa Fe Drive interchange.
- Replacement of the southbound Santa Fe Drive bridge over the South Platte River
- Reconfiguration of Santa Fe Drive and Kalamath Street between I-25 and Alameda Avenue, along with associated access roads in this area
- Replacement of the Alameda Avenue bridge over I-25
- Reconstruction of I-25 from Broadway viaduct to north of Alameda Avenue
- Minor additional improvements to nearby roadways

Elements to be Built

- Relocation of the on-ramp from northbound Federal Blvd to eastbound US 6 from the south and east sides of Barnum Park East to the north side of Barnum Park East.
- Conversion of 5th Avenue to two-way operation east of Federal Boulevard
- Reconstruction of Barnum Park East
- Construction of a south side slip ramp providing access to Bryant Street via the US 6/ Federal Boulevard interchange
- Closure of the partial interchange at US 6 and Bryant Street, with Bryant Street access provided via the slip ramps and collector-distributor system included in the US 6/ Federal Boulevard interchange
- Replacement of the Federal Boulevard bridge over US 6, along with associated improvements

Required NEPA Approval Process

NEPA Decision Document Providing Clearance for Construction

Reevaluation

ROD

ROD
