About the CO 52 PEL / ACP

Colorado Department of Transportation (CDOT) is preparing a Planning and Environmental Linkages (PEL) Study and Access Control Plan (ACP) for the state highway CO 52 corridor. In recent years, traffic congestion along CO 52 has increased dramatically. The communities along the corridor utilize CO 52 to commute to business and industry centers.

This Study will develop a long-term vision, identify transportation needs, and understand environmental resources in the corridor. The PEL is a tool for CDOT to study the corridor to make project or planning decisions. The goal is to gather enough detail so the information collected can be utilized to accelerate future corridor projects.
