

# PUBLIC MEETING

## US 34 EAST PERMANENT FLOOD REPAIRS

*Damage to US 34 from the September 2013 flood event*

### Construction Begins in October

When last September's storms washed out a large section of US 34 east of Greeley, it became clear that a better, long-term solution was needed to ensure the road could withstand a similar major flooding event in the future.

- CDOT built a temporary road around the area that was blown out by the flood.
- Construction will begin soon on a \$22 million permanent fix to the road that will include a new bridge.
- CDOT officials and Flatiron will be on-hand at the public meeting to answer questions about the project. A brief presentation will be conducted at 6:45 p.m.

**October 14, 2014 6 – 8 p.m.**
