

# SH 9 Frisco Main Street to Iron Springs Project Overview

## Project Highlights:

- Provide two lanes in each direction connecting Summit Blvd to the Iron Springs project.
- Build sidewalk between Main St. and the County Commons.
- Install a pedestrian underpass under CO 9 between the Peninsula Recreation Area and the Summit Stage bus stop near the Summit County Library.
- Improve the 8<sup>th</sup> Ave intersection by constructing a roundabout that will allow better local access to the north.
- Rebuild the Main St. intersection, so the sweeping southbound right turn lane can be reconstructed closer to the intersection. This will slow traffic prior to reaching 7<sup>th</sup> Ave. and allow a crosswalk to be installed across the Main St. leg of the intersection.
- The Water Dance Dr. /Peak One Blvd intersection could either be a roundabout or a signalized intersection. The design for both options will continue to be developed to determine impacts and cost. The roundabout is the more expensive option, and construction costs must be identified to determine if it can be built within the project budget.
