

NEWS FROM:

COLORADO

Department of Transportation

Dear I-70 B 1st St. & Grand Ave. agency partners and stakeholders,

The project team will hit the ground running on Monday, May 10 and we wanted to be sure you were aware of the scheduled traffic impacts. Traffic control will be placed beginning at 7:00 a.m., with several streets in and near the project limits to be impacted. The first phase of the project will remove and install new waterline and storm drain in several locations.

Traffic Impacts

- Just south of the project, West Main St. will be **closed**. Motorists can detour around this closure by accessing Spruce St. to West Rood Ave.
- Also just south of the project, East Main St. will be **closed** from I-70 B to just north of the Grand Junction Convention Center. Motorists can detour down Rood Ave. to North 3rd St.
- I-70 B from Mulberry St. to Main St. will become one lane in each direction, 24-hours a day/seven days a week.
- **Access to businesses will remain open.**
- Alternate routes are advised (see map below).

Project work also includes replacing storm drains and water lines, milling, paving, concrete improvements (sidewalks, ADA curb ramps), replacement of signals, as well as lighting and landscaping enhancements. Once complete the project will improve safety, congestion, and increase multimodal opportunities.

Project info

The project area includes the I-70 Business Loop (I-70B) from Mulberry Street to Rood Avenue, and Colorado Highway 340 (Broadway) from Mulberry Street/Rice Street to 2nd Street.

Stay Informed and Connect with the project

Project information is available at:
