

I-70B 1st St. & Grand Ave. Improvement Project

Pedestrian and Bicycle Alternate Route (as of August 2021)

Crews are scheduled to construct a temporary roundabout located at the southwest corner of the intersection of I-70B and CO 340/Broadway which will allow traffic to continue to flow through the intersection work zone. Due to this change in the traffic configuration, cyclists and pedestrians will need to use the identified alternate route (see map below). This identified route will reduce direct contact with **work site vehicles, equipment and operations.**

- Pedestrian and bicycle traffic will need to follow the signed route.
- If you encounter an area of the project where a flagger is directing traffic, please stop and wait for instructions to cross. Otherwise, existing traffic signals in the area will continue to operate for crossing at identified cross walks.
- Pedestrians and cyclists are not permitted in “dead lanes” of traffic control. Equipment is operating in these zones and could come into direct conflict with someone who enters the work zone.
