

Clear Creek Scour Mitigation on I-70

PROJECT OVERVIEW

Starting on Monday, Nov. 14 and lasting until spring 2023, the Colorado Department of Transportation and contract partner Structures, Inc. will begin a state and federally-funded scour mitigation project along Interstate 70 and Clear Creek in Jefferson County. Work includes adding micro-piles and concrete caps to the piers of two bridges at the I-70/I-76 interchange and armoring a wall along I-70 and Clear Creek near Wadsworth Blvd.

Erosion of the soil around a bridge or wall's foundation is frequently referred to as scour which can over time lead to structure failure. To manage the risk of failure, counter-measures are used to mitigate scour effects.

PROJECT LOCATION

The project is located along I-70 and Clear Creek, from Mile Point 269 east to the I-70/I-76 interchange at MP 269.9 and includes both Arvada and Wheat Ridge, in Jefferson County.

PROJECT SCHEDULE

The project begins on Monday, Nov. 14 and will last until spring 2023. Working hours are 7 a.m. to 6 p.m. (daylight hours) Monday to Friday. Some Saturday work is expected.

TRAFFIC, PEDESTRIAN & CYCLIST IMPACTS

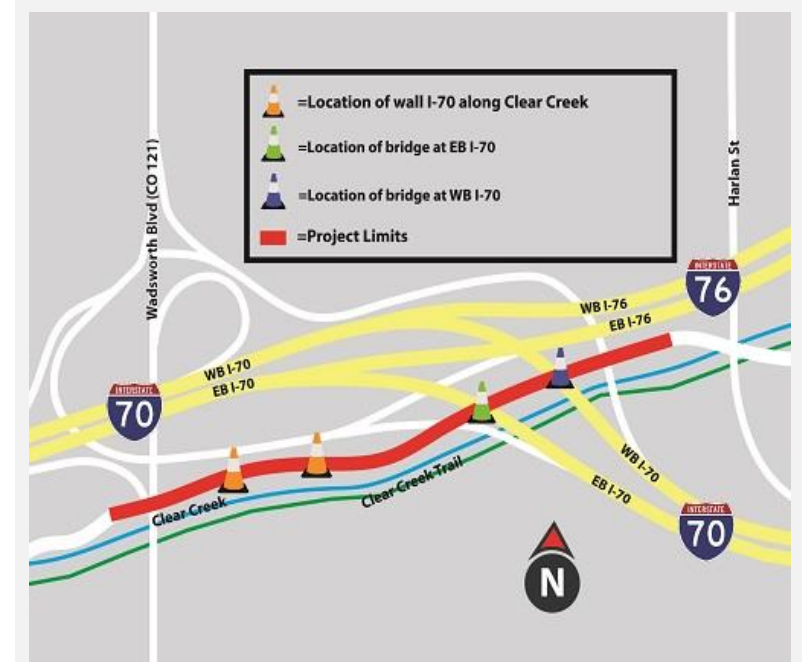

Intermittent lane closures will exist at the eastbound I-70 on ramps from southbound and northbound Wadsworth Blvd (Exit 269A), and on westbound I-70 west of Harlan St (Exit 270) during concrete work. Some narrowing of the Clear Creek Trail will be in place during certain work activities, managed by flaggers and/or signage.
