

## PROJECT UPDATE: Edwards Interchange

For the Week of December 12, 2010

*Happy Holidays!*

We're excited to report that all four roundabouts will be open to traffic, and the traffic signals removed, within the next few working days. While the work will not be complete, you will be able to appreciate the improved traffic flow. As work continues, there will still be flagger manned traffic control during non-peak hours (9 a.m. – 4 p.m.) as crews continue to complete paving, curb and gutter.

ACC won't be completely done with the project until late spring 2011. We intend to be out of the traffic area by December 17 with crews off-site by December 23. If there are key (safety items) that aren't complete at that time ACC will return in January to complete those items. Crews will then return in the spring to complete the work within the Northstar Business Center and complete the aesthetic work.

ACC will alert you to any significant traffic delays but also encourage you to check our hotline at 970-949-1102 or the CDOT website for more information
