

Natural Resources

Issues that will be Evaluated

Terrestrial wildlife (big horn sheep habitat, Twin Tunnels land bridge is used by wildlife, possible need for wildlife fencing, work with ALIVE)

Aquatic resources (maintain fisheries habitat, work with SWEEP)

Water quality (effect of mineral runoff from geological features , effect of mine waste, winter maintenance activities, maintain or enhance water quality)

Wetlands/Clear Creek (avoid encroachment on the Creek if possible)

Riparian habitat along Clear Creek

Floodplain – portions of the I-70 highway may be in the floodplain

Any others of concern to you?
