

SH 392 Lucerne East Resurfacing Project

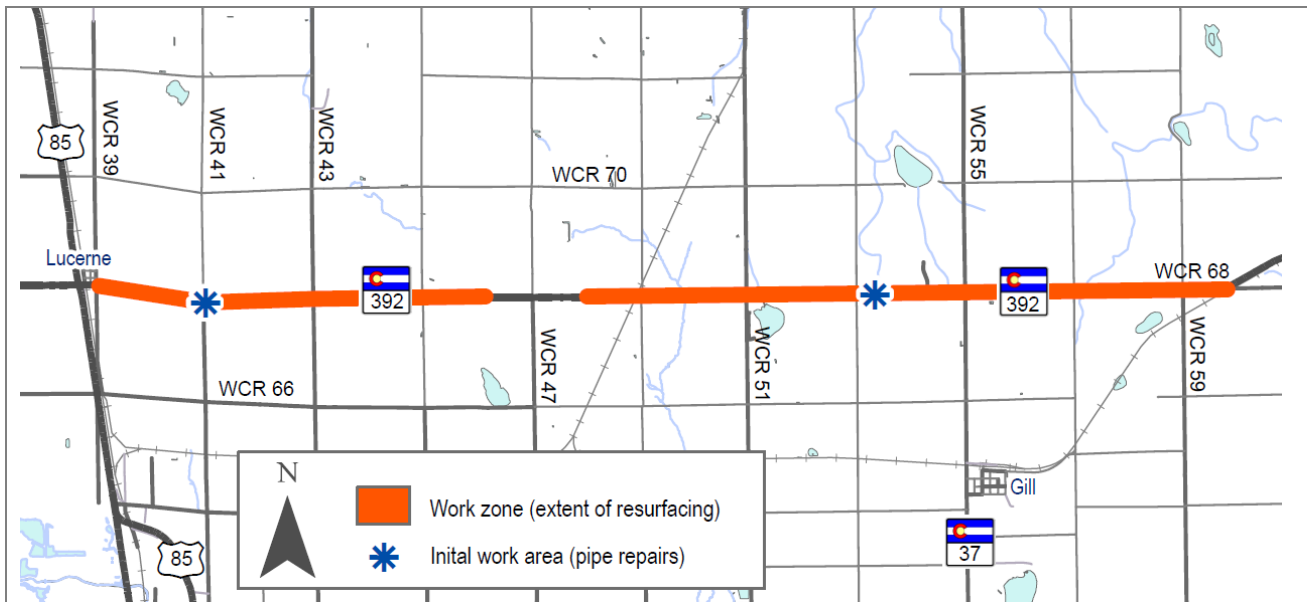

CONSTRUCTION
ANNOUNCEMENT

April 2016

One lane traffic on SH 392 starts soon

PIPE WORK NEAR WCR 53 AND WCR 41 WILL OCCUR FIRST

In April, CDOT and prime contractor, Martin Marietta, will begin a roadway resurfacing project on State Highway 392 from east of US Highway 85 in Lucerne to Weld County Road 59. The entire 10-mile work zone will not be under active construction at the same time. First, crews will make repairs to an irrigation pipe east of Weld County Road 53. Near WCR 53, a temporary traffic signal system will alternate eastbound and westbound SH 392 traffic under a single-lane configuration for several weeks. Simultaneously, crews will begin repairs to an irrigation culvert at WCR 41, which will require a single-lane configuration with flagger control during daylight work hours. Delays should be minimal at both of these locations. All work is weather-dependent and the schedule is subject to change.

ROAD RESURFACING BEGINS IN LATE APRIL

After pipe repairs are complete, the contractor will resurface SH 392 (Mile Point 115.5 to MP 126) during daylight hours. After crews mill the existing surface, the road base will be improved before placing new asphalt. More extensive roadbed repairs will be made at spot locations. There is a 1/2-mile segment near WCR 47 that is not included in the project.

Traffic Impacts

Motorists should expect one-lane alternating traffic conditions for up to two miles at any point within the work zone from late April through August 2016. Delays up to 20 minutes are possible. Speed limits may be reduced and fines will be doubled. Weekly lane closure information for all state highways is available on www.cotrip.org.

ADDITIONAL INFORMATION— If you have questions or concerns, call the project hotline at 970-714-0480 or send an email to: sh392LucerneEast@workzone.info. To sign up for email alerts, visit the project website at www.codot.gov/projects/sh392lucerneeast.
