

Region-wide striping project throughout southwestern and south-central Colorado begins June 7

PROJECT OVERVIEW

The Colorado Department of Transportation, in partnership with Kolbe Striping Incorporated, will begin restriping work throughout southwestern and south-central Colorado. This project involves striping over existing pavement markings on both asphalt and concrete pavement types; these new white and yellow markings will match existing pavement lines. The following highways will be worked upon: US 160, US 491, CO 145, US 550, US 24, 50, US 285, and CO 291.

PROJECT SCHEDULE

Work is scheduled to begin on June 7 and is expected to last until late August 2021. Normal working hours will be from 7:00 a.m. to 5:00 p.m.

TRAVEL IMPACTS

- Throughout the duration of this project, there will be occasional single-lane restrictions controlled by flaggers or portable traffic signals. Arrow boards will display caution symbols and “Highway Painting Next 2 miles” signs.
- Mobile traffic control will be used in work zones with slow moving directional traffic.
- Use caution and slower speeds when traveling through the work zone as there will be wet paint throughout.
- Weekend and night work may occur occasionally but will be announced in advance.
