The Environmental Justice analysis has been updated in Section 3.2.2 Environmental Justice of the *U.S. 287 at Lamar Reliever Route Environmental Assessment* (EA) using 2010 U.S. Census data. The analysis in the EA represents the most current data for defining low-income and minority populations and supersedes the income, race, and ethnicity data reported in the 2004 Environmental Justice Technical Memorandum and 2007 Addendum to the Technical Memorandum.
