

US 50 PURCELL INTERCHANGE

PROJECT OVERVIEW

The Colorado Department of Transportation has completed 60% of work in the first phase of construction of a new interchange at US Highway 50 and Purcell Boulevard, and work completed overall in the project is 35%.

PROJECT PROGRESS

- Placement of embankment and base course materials for the third travel lane on westbound US 50
- Concrete curbing, gutters and sidewalks installed along the east side of Purcell Blvd.

UPCOMING WORK

A number of construction activities will impact motorists traveling through the construction zone this spring and summer.

Purcell Boulevard:

- Traffic on Purcell Blvd. will be shifted to the east so crews can install curb, gutter and sidewalk along the west side of the street between Industrial Blvd. and Spaulding Ave. (Map A)
- Crews will construct medians along Purcell Blvd. between Industrial Blvd. and Spaulding Ave. and traffic will be shifted away from the middle of the road to make room for the work. (Map B)

US 50:

- Work on the third travel lane on westbound US 50 between Pueblo Blvd. and Purcell Blvd. will be finished.
- Crews will complete work on both on- and off-ramps on both the eastbound and westbound sides of US 50 at Purcell Blvd.

Preparing for bridge work:

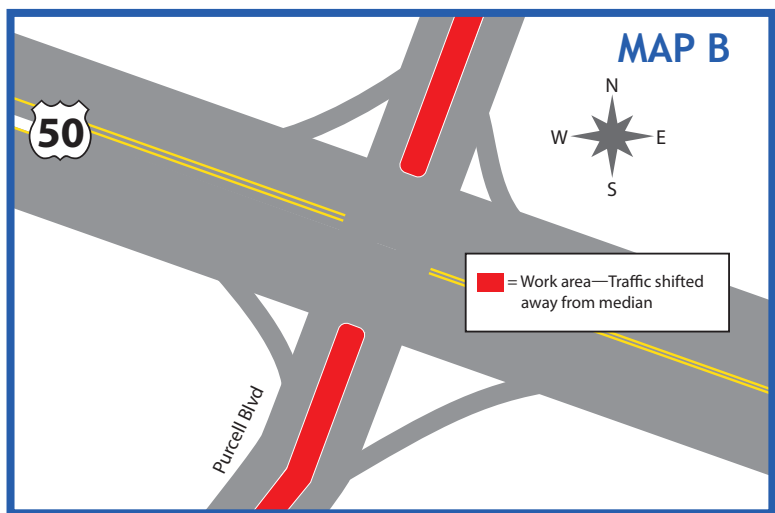

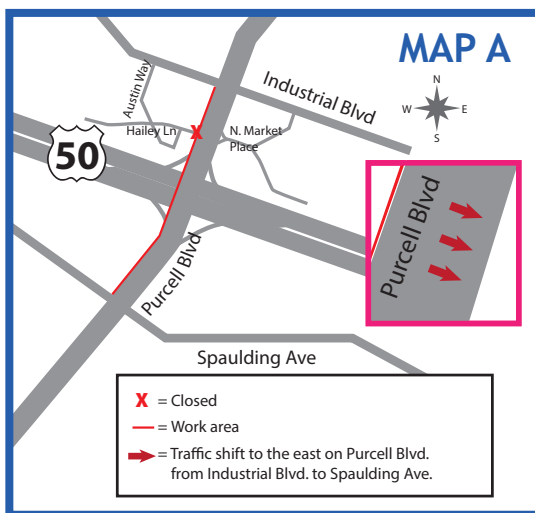

- New traffic lights will be installed where the ramps connect with Purcell Blvd.
- Motorists traveling in both directions on US 50 will then be shifted to the ramps so crews can begin work on the bridge that will move highway traffic over Purcell Blvd. (Map C—on reverse side of this flyer)

SCHEDULE AND WORK HOURS

Work is expected to continue through spring of 2022.

Normal working hours will be from 7 a.m. to 7 p.m. Monday through Friday. Work during overnight hours can be expected during some phases of the project. No work is expected on major holidays.

US 50 PURCELL INTERCHANGE

(continued from other side)

TRAFFIC IMPACTS

Work continues behind barriers on both eastbound and westbound US 50, as well as northbound and southbound Purcell Blvd. with minimal day-to-day impact to motorists.

Speed limits on US 50 through the construction zone have been reduced to 55 miles an hour. Motorists should be alert to crews working near the roadway. When appropriate, flaggers will direct motorists through work performed on roadways. Slight delays can be expected.

CONTACTING THE PROJECT TEAM

If you have questions about the project, or would like to receive traffic alerts, please contact the Public Information Team. We will respond within 24 business hours.
