## Cottonwood Pass Concept Design (Eagle and Garfield Counties)

[www.codot.gov/projects/cottonwood-pass-concept-design](http://www.codot.gov/projects/cottonwood-pass-concept-design)

### IMPROVEMENTS FOR COTTONWOOD PASS

The Colorado Department of Transportation (CDOT) is supporting Eagle and Garfield counties to design safety improvements on county roads that traverse Cottonwood Pass between Gypsum and Colorado Highway 82. The counties identified 14 areas that need enhancements to make the county road safer and more functional as a vital travel connection between the local communities. This project will assess existing conditions and result in 10% concept design for improvements. Potential site improvements include curve softening, improved sight distance, and increased road width in specific areas to accommodate two vehicles in passing. Overall widening and paving of the corridor is not planned. With the information provided by this project, Eagle and Garfield counties will determine next steps for implementing improvements. The counties will complete design and evaluate pursuing construction of improvements as funding becomes available in the future.

### YOUR INPUT MATTERS!

Public meetings will be held on July 19 and 20 to introduce the project and gather feedback regarding the potential improvements. Public and stakeholder input will continue to inform decision-making.

If you are unable to attend, you may view the meeting's graphic displays on the project web page after the meetings. Submit a comment anytime via the online comment form.

### STAY INFORMED

Please sign up for the project mailing list on the project web page (noted above) to receive updates regarding future public meetings and project progress.

Future updates will be sent only to those requesting to stay informed.
