

SUMMARY: Not Recommended

- Better operations and safety than Single Point Urban Interchange alternative
- Lower operational and safety benefits than Diverging Diamond Interchange alternative
- Impacts to area business access and properties similar to Diverging Diamond Interchange alternative

POST-PEL STUDY EVALUATION

Optimize operations and reduce congestion

- Typical interchange layout for drivers to negotiate
- Improved merge/diverge operations
- Improved interchange intersection operations
- Congested eastbound off ramp operations (PM peak hour)

Improve traveler safety

- Safety benefits due to reduction in congestion

Accommodate multimodal connections

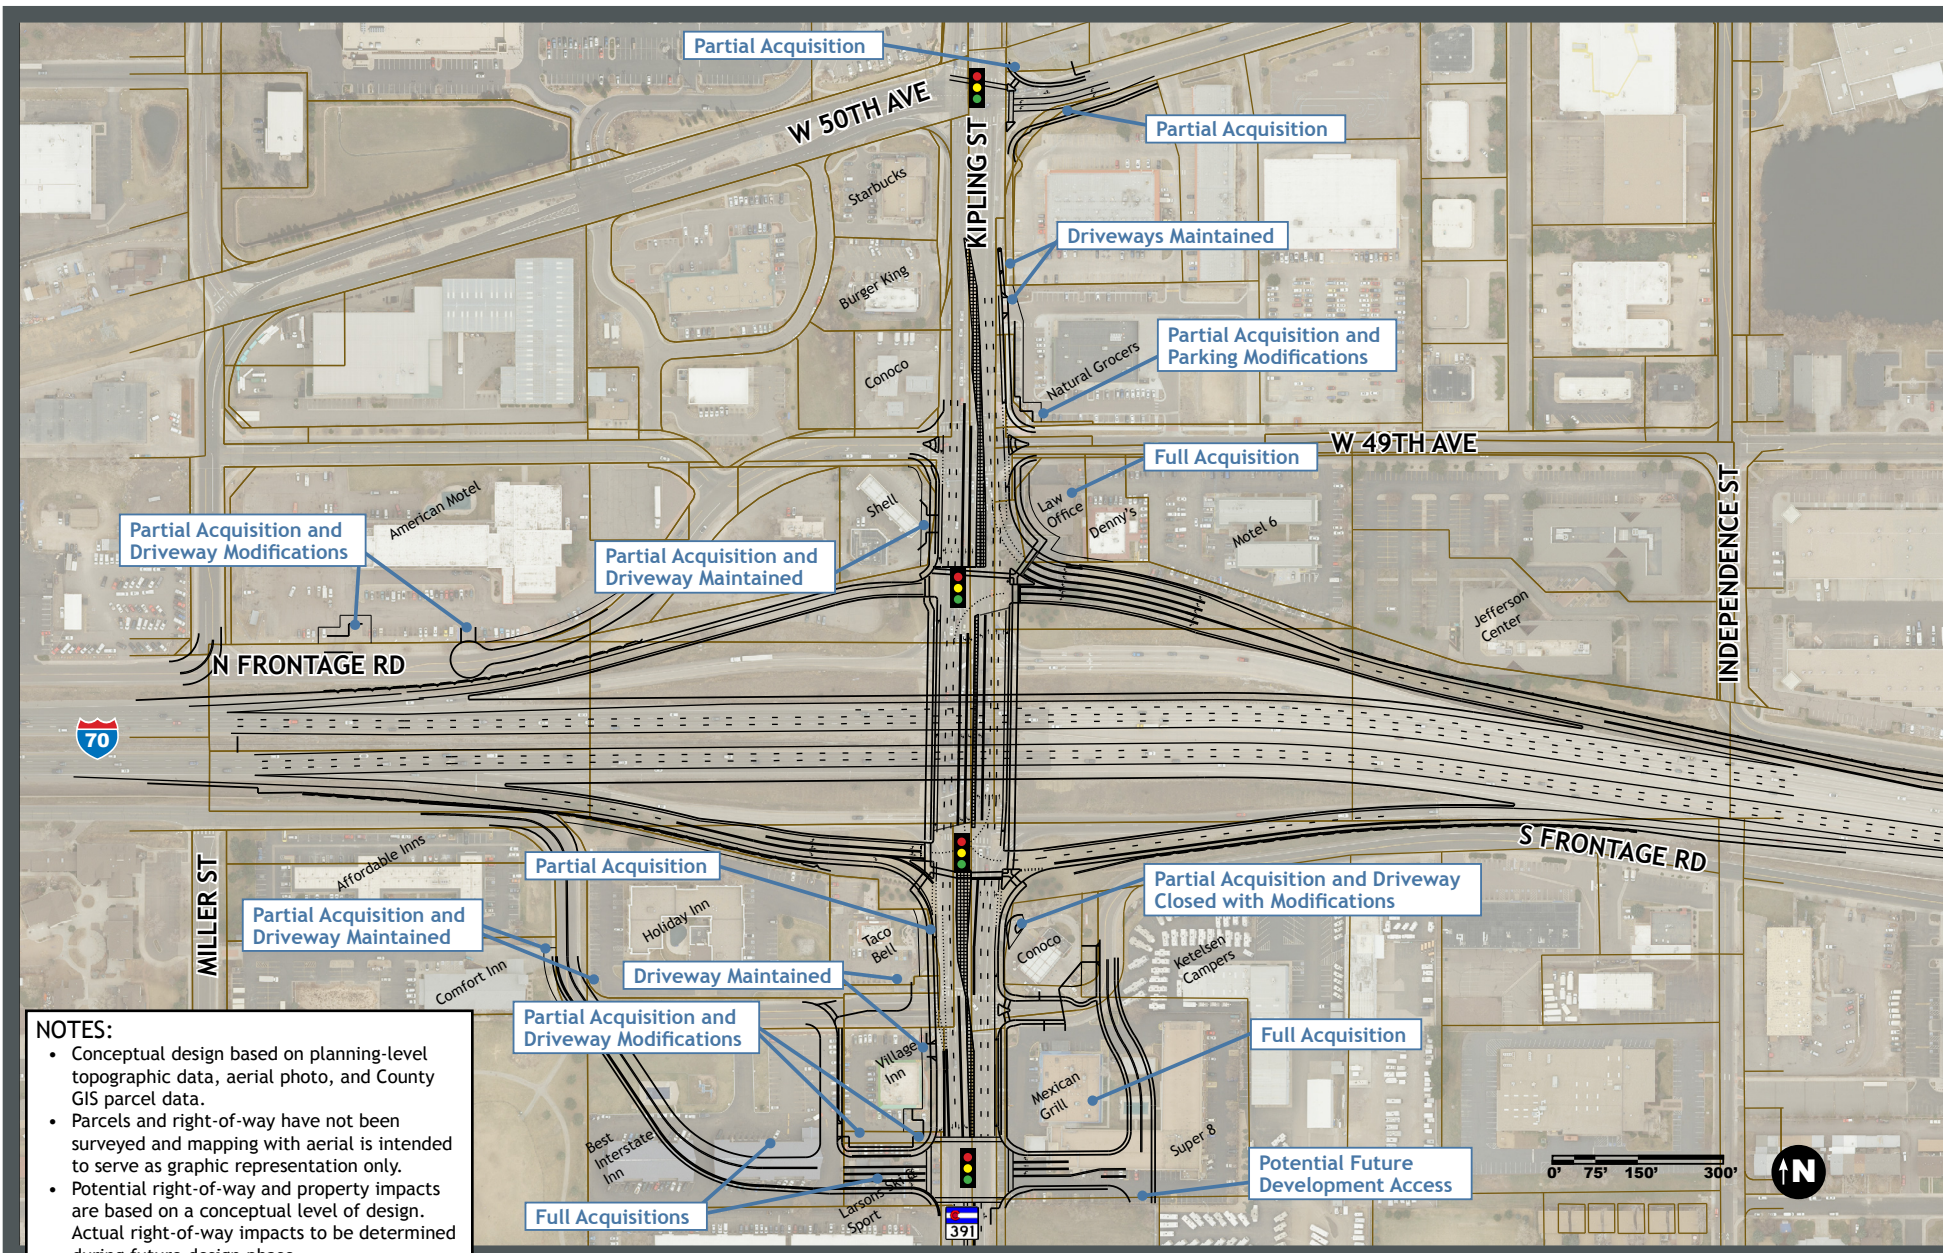

- Shared use paths and bicycle lanes directly through the interchange
- No signalized crossing at 49th Avenue results in some out-of-direction travel for pedestrians and bicyclists

Avoid and minimize community impacts

- Moderate impacts to community with direct access to 49th Avenue reduced and South Frontage Road access moved farther south
- Four potential full property acquisitions and moderate partial acquisitions

Maximize constructability

- Relatively high property acquisition costs (\$10-15 million), but total interchange cost (\$55-65 million) consistent with other alternatives
- Constructability easy since most construction is outside of traffic on new alignments with typical structure construction
- Potential for short-term freeway and ramp improvements with minor throw-away and opportunities for ramps to be constructed as separate projects with bridge work later

NOTES:

- Conceptual design based on planning-level topographic data, aerial photo, and County GIS parcel data.
- Parcels and right-of-way have not been surveyed and mapping with aerial is intended to serve as graphic representation only.
- Potential right-of-way and property impacts are based on a conceptual level of design. Actual right-of-way impacts to be determined during future design phase.
- Additional right-of-way and/or easements may be required for slope, drainage, utilities, and/or construction.
