

WILDLIFE CROSSINGS

Providing two wildlife underpasses near mileposts 220.1 and 217.3 to reduce the barrier effect of the highway on wildlife movements, improve wildlife habitat access, and reduce wildlife-vehicle collisions.

WESTBOUND

CLIMBING LANE

Widening I-70 to the north to construct a westbound auxiliary or "climbing" lane along the steep vertical grade between the Bakerville Exit and EJMT.

I-70 CHAIN STATIONS

Adding, expanding, or consolidating existing chain up stations to increase capacity and improve safety of chain up operations and emergency truck parking.

US 6 INTERCHANGE

Reconfiguring the US 6/Loveland Pass interchange to provide a longer on-ramp, provide off-ramp storage, improve roadway geometry, and reduce icing conditions.
