

New traffic signal helps facilitate operations of left turn movement at the new intersection.

Realign eastbound through movement to better align with the receiving lane on east side of intersection.

Reconstruct traffic signal so that signal heads are over each lane and more visible.

New raised island to prevent unexpected turning vehicles. Protects left turns onto I-70.

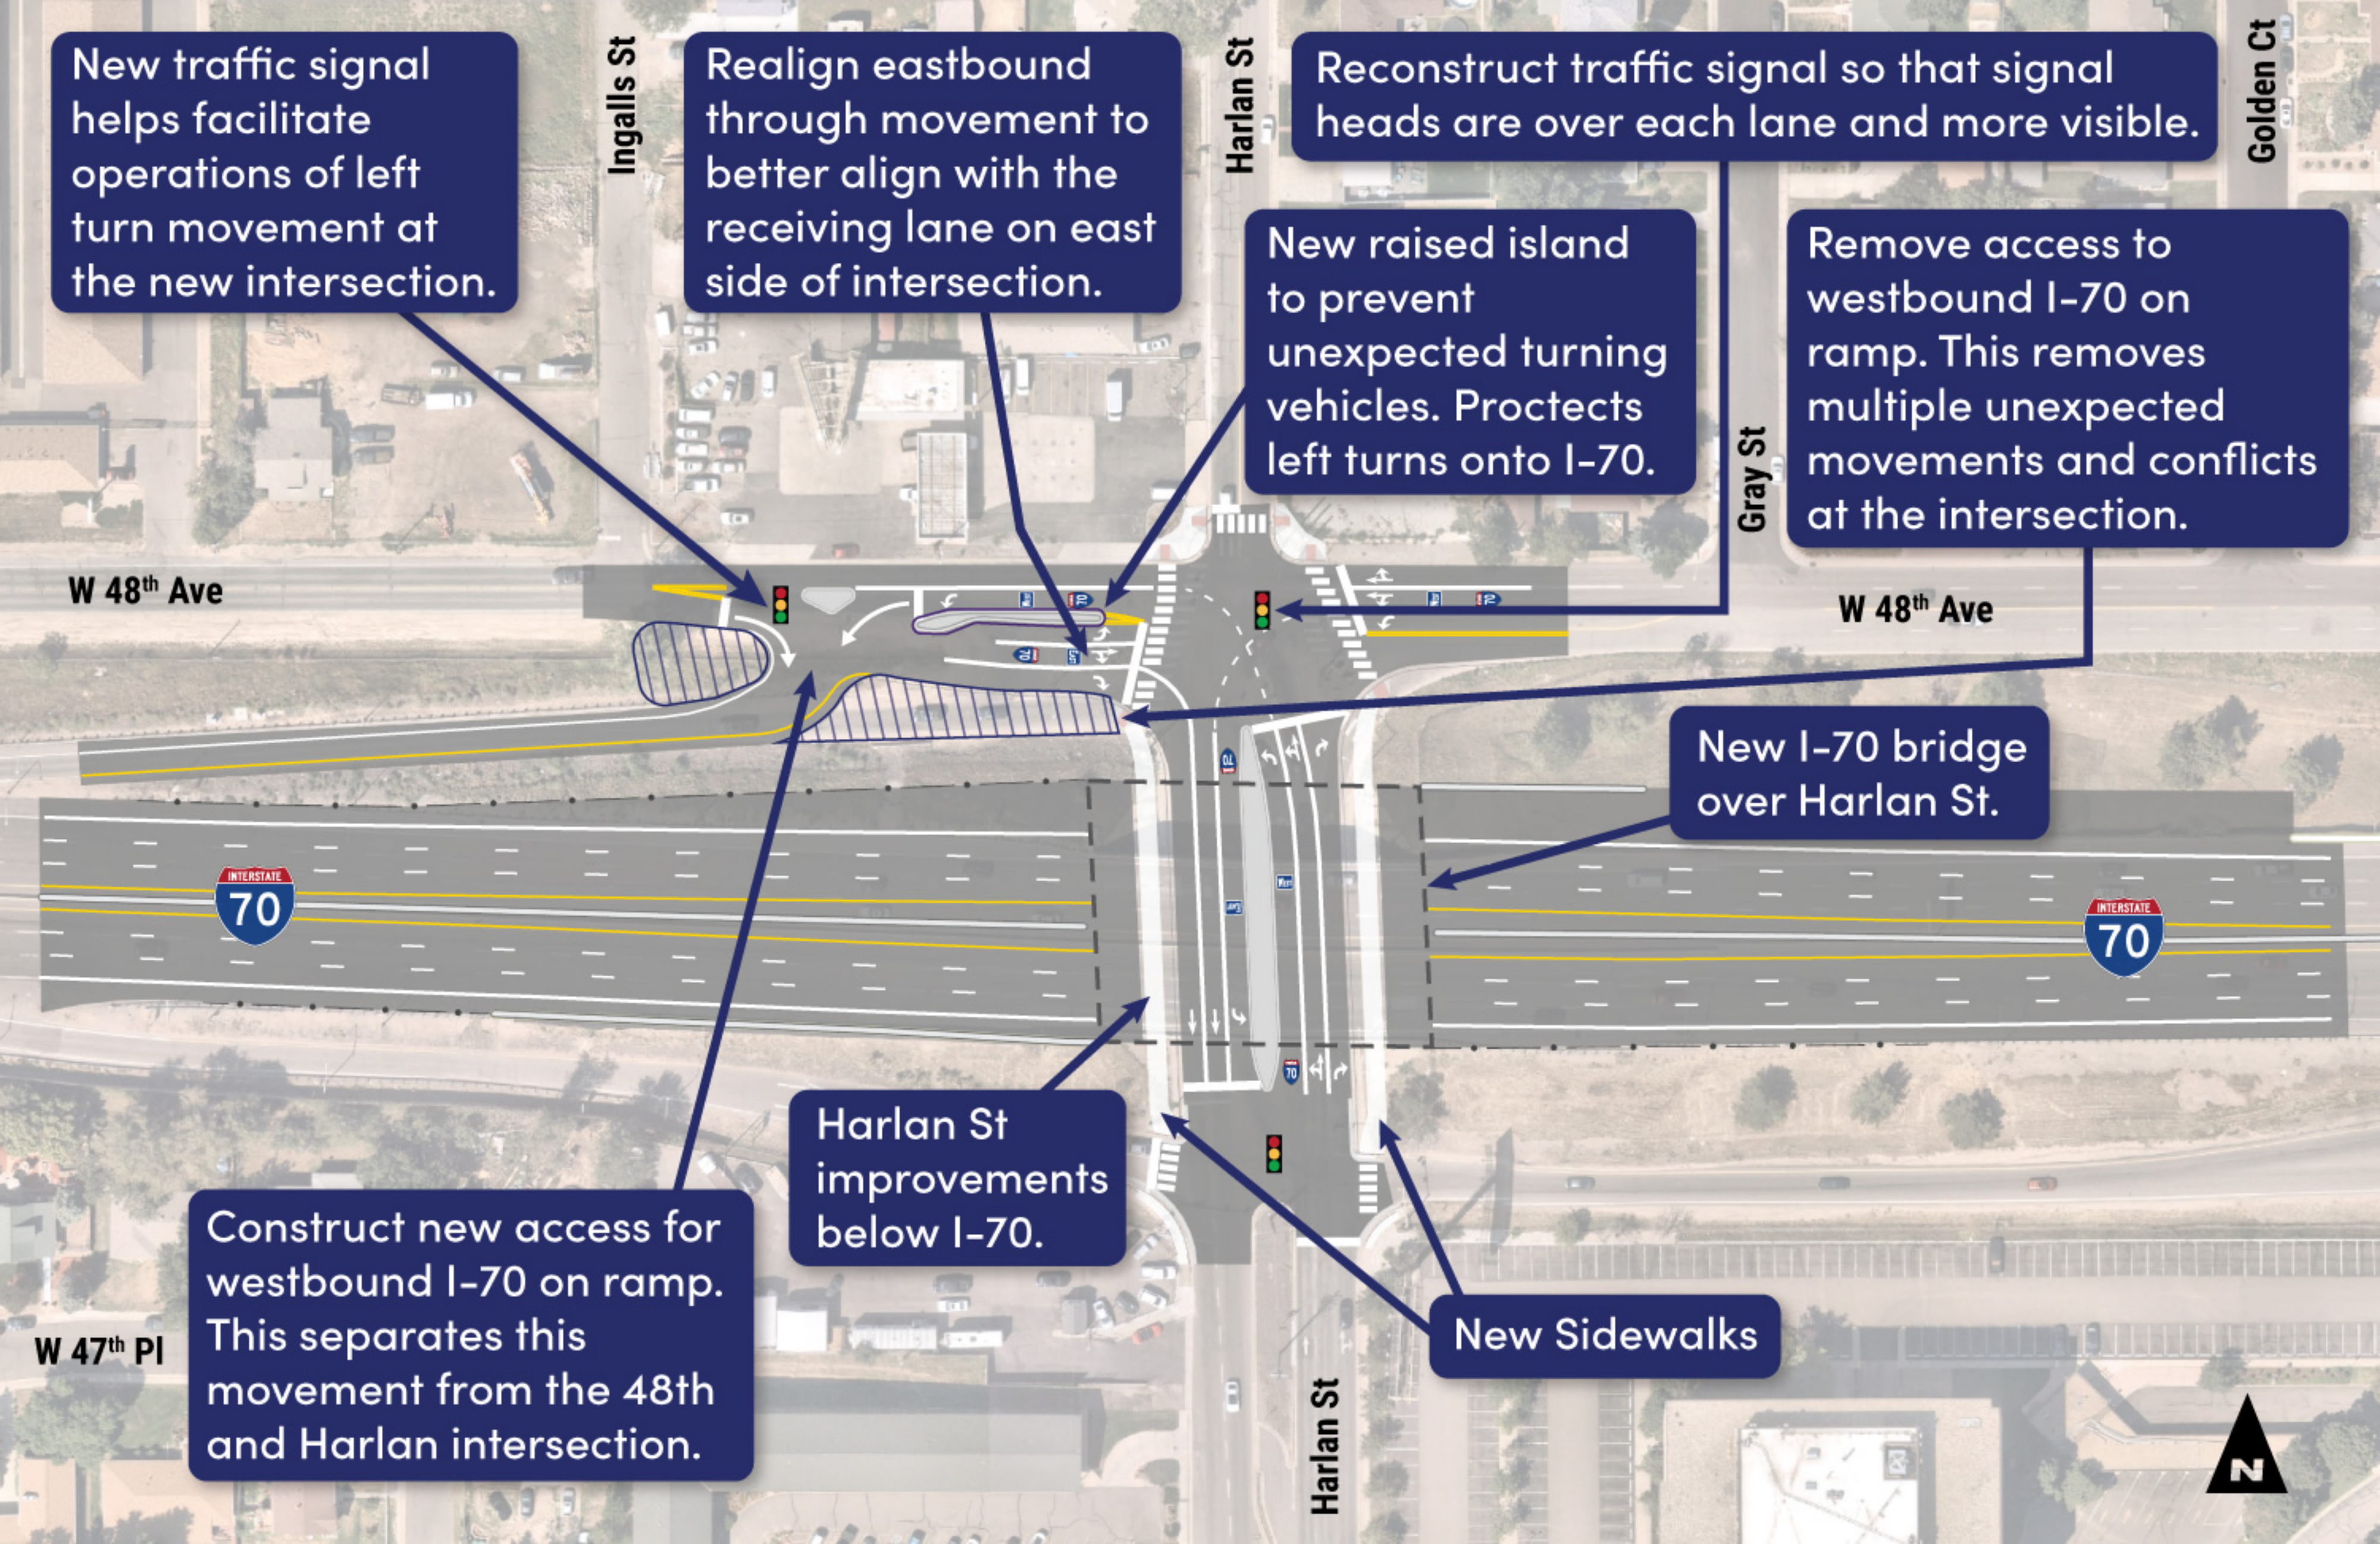

Remove access to westbound I-70 on ramp. This removes multiple unexpected movements and conflicts at the intersection.

New I-70 bridge over Harlan St.

Harlan St improvements below I-70.

New Sidewalks

Construct new access for westbound I-70 on ramp. This separates this movement from the 48th and Harlan intersection.
