

Next Steps

Remaining Study Tasks

The remaining major tasks for this study are outlined below. This Planning and Environmental Linkage (PEL) Study is expected to be complete in March 2013.

- Refine Level 2 alternatives recommended to move forward
- Complete Level 3 alternatives screening
- Identify potential funding sources
- Prioritize recommended improvements
 - » If multiple alternatives are recommended to move forward into future environmental study, prioritization will include identification of common elements of remaining alternatives that could be constructed as early action improvements as funding is secured
- Document recommendations in the PEL Report
 - » Technical summary of the engineering and environmental considerations, assumptions, analysis methodologies and graphic displays of final recommended improvements
- Send notification of final recommendations in a newsletter to mailing list contacts
