I-70 CSS Corridor Team Members

Our next CSS Corridor Team

Our next CSS Corridor Team meeting will be March 21, 2008, from 9:00 a.m. to 3:00 p.m. We will meet at the Silverthorne Pavilion, located off Highway 9 and 4th Street, North of I-70 at 400 Blue River Parkway. (Map attached)

Our agenda will be to discuss the layout of the CSS Guidance Manual and then break into three groups to review the efforts of the Process Working Group. The breakout groups will begin to lay the framework for the County Working Groups. These groups will be used to look at interests and procedures unique to each county and provide more specific direction to the Guidance Manual. Materials will be available on the website.

We look forward to seeing you on March 21, 2008. Please RSVP by responding to this email by Friday, March 14th.

An update on the CSS process

At the last CSS Corridor Team meeting (Dec. 6th) we gathered hundreds of strategies on how to accomplish or protect our Core Values. The Project Team is currently sorting through these strategies and using them to begin some of the CSS Guidelines. You can review and add more strategies on the website, http://www.i70css.com/, by selecting CSS Corridor Team on the left.

During our discussions sustainability has come up as an overarching goal for the corridor. We recently found an article that you might find interesting,"Sustainable Transportation Indicators: A Recommended Program To Define A Standard Set of Indicators For Sustainable Transportation Planning" (www.vtpi.org/sustain/sti.pdf).

One current CSS effort is the formation of Working Groups. These groups will work on different elements of the CSS Guidance Manual.

One of these working groups is the Process Working Group, charged with developing specific methods that will ensure future decision processes are fair, equitable, open and collaborative. These methods will be included in the CSS Guidance Manual and will be used by all future planners, designers, and contractors. If you are interesting in being a part of the group, information and a sign up sheet is on the website, http://www.i70css.com/.

We are also forming County Working Groups. The three county groups will work on the CSS Guidance Manual to include specific county preferences, guidelines unique to a county's needs, and directions on how to interact with established county boards, committees, councils and commissions.
