EXPRESS LANES | I-25 NORTH

Berthoud — Johnstown

The Colorado Department of Transportation (CDOT) and contractor partner, Ralph L. Wadsworth/SEMA, a Joint Venture LP, will begin construction on the I-25 North Express Lanes between Berthoud and Johnstown as soon as fall 2019.

Communities along the I-25 North corridor are expanding rapidly, contributing to major economic growth in Northern Colorado. CDOT will support this growth by delivering the I-25 North Express Lanes. In the section of I-25 between Berthoud and Johnstown, this project will:

- Increase highway capacity by adding an Express Lane in each direction
- Improve infrastructure by reconstructing interchanges
- Improve safety by replacing eight aging bridges and the Great Western Railroad crossing to improve geometric deficiencies (bridge clearance, horizontal curves)

- Improve mobility by adding Express Bus service (Bustang) throughout the corridor along with carpool and transit facilities
- Increase technology by incorporating the use of intelligent transportation systems
- Improve drainage by making major utility improvements

During construction, two lanes of traffic on I-25 will be maintained in each direction during peak travel times, but drivers can expect overnight lane closures in the area. In addition, lane and shoulder widths will be minimized, and the speed limit will be reduced. Please pay attention and follow posted speed limits.

Thank you for your patience during construction. Please drive safely!
