Ben Borton, Capital Tezak
- Impacts for Guffey Structure
- First Responder Access
- Roundtable for Discussion/Concerns
Cynthia Bailey, CDOT
- Contact Information
Monica Ramey, Public Communication
- Closing

Region 2 Bridge Bundle Project

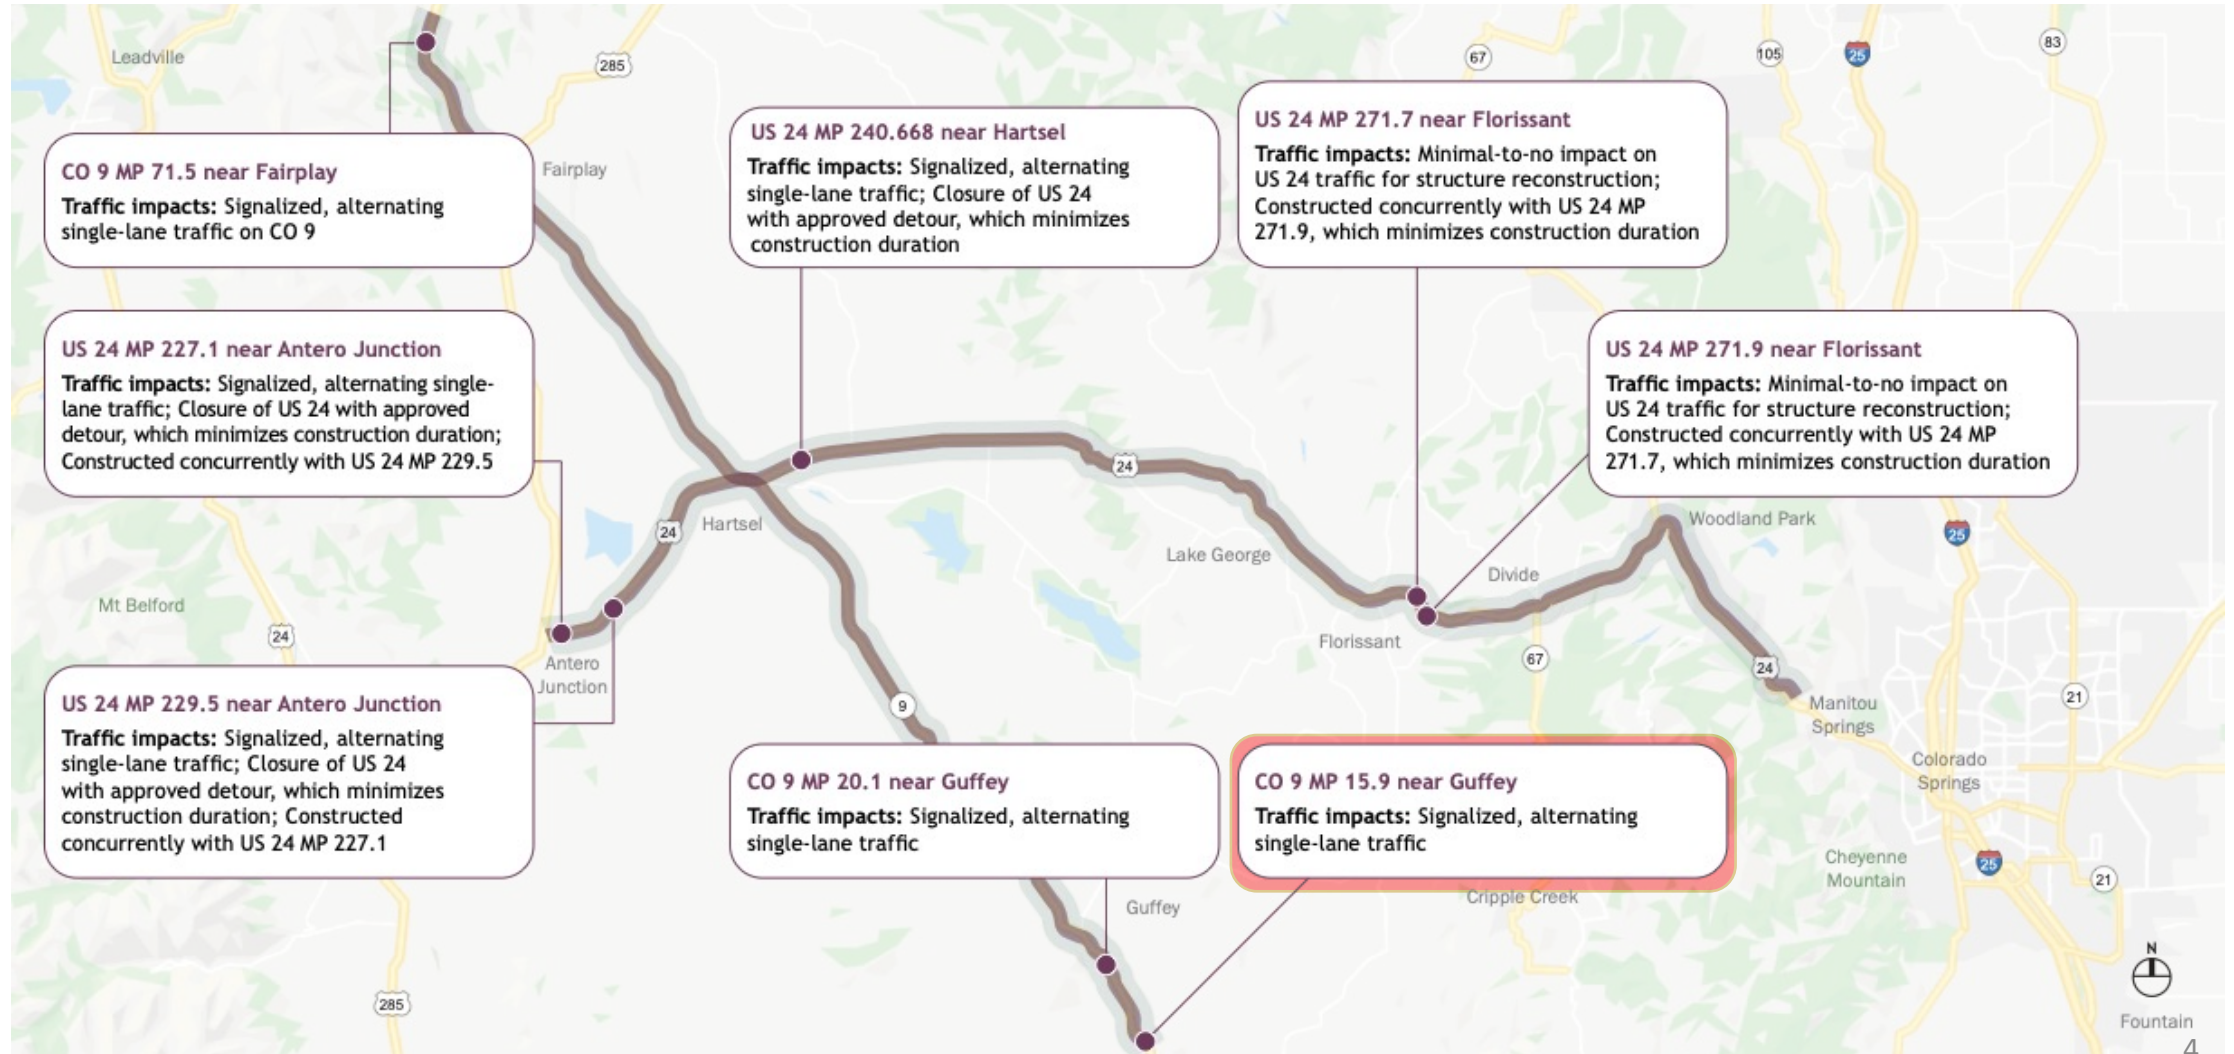

Project Overview

- 17 structures in southeastern Colorado are being replaced on three separate essential corridors
 - 3 structures on Colorado Highway 9
 - 5 structures on United States Highway 24
 - 9 structures on United States Highway 350
- The updated structures will ensure motorists they are driving on more stable and up to date structures with life spans of 100 years
- Construction completion of the Bridge Bundle \$43 million project is slated for late 2024

Region 2 Bridge Bundle Project

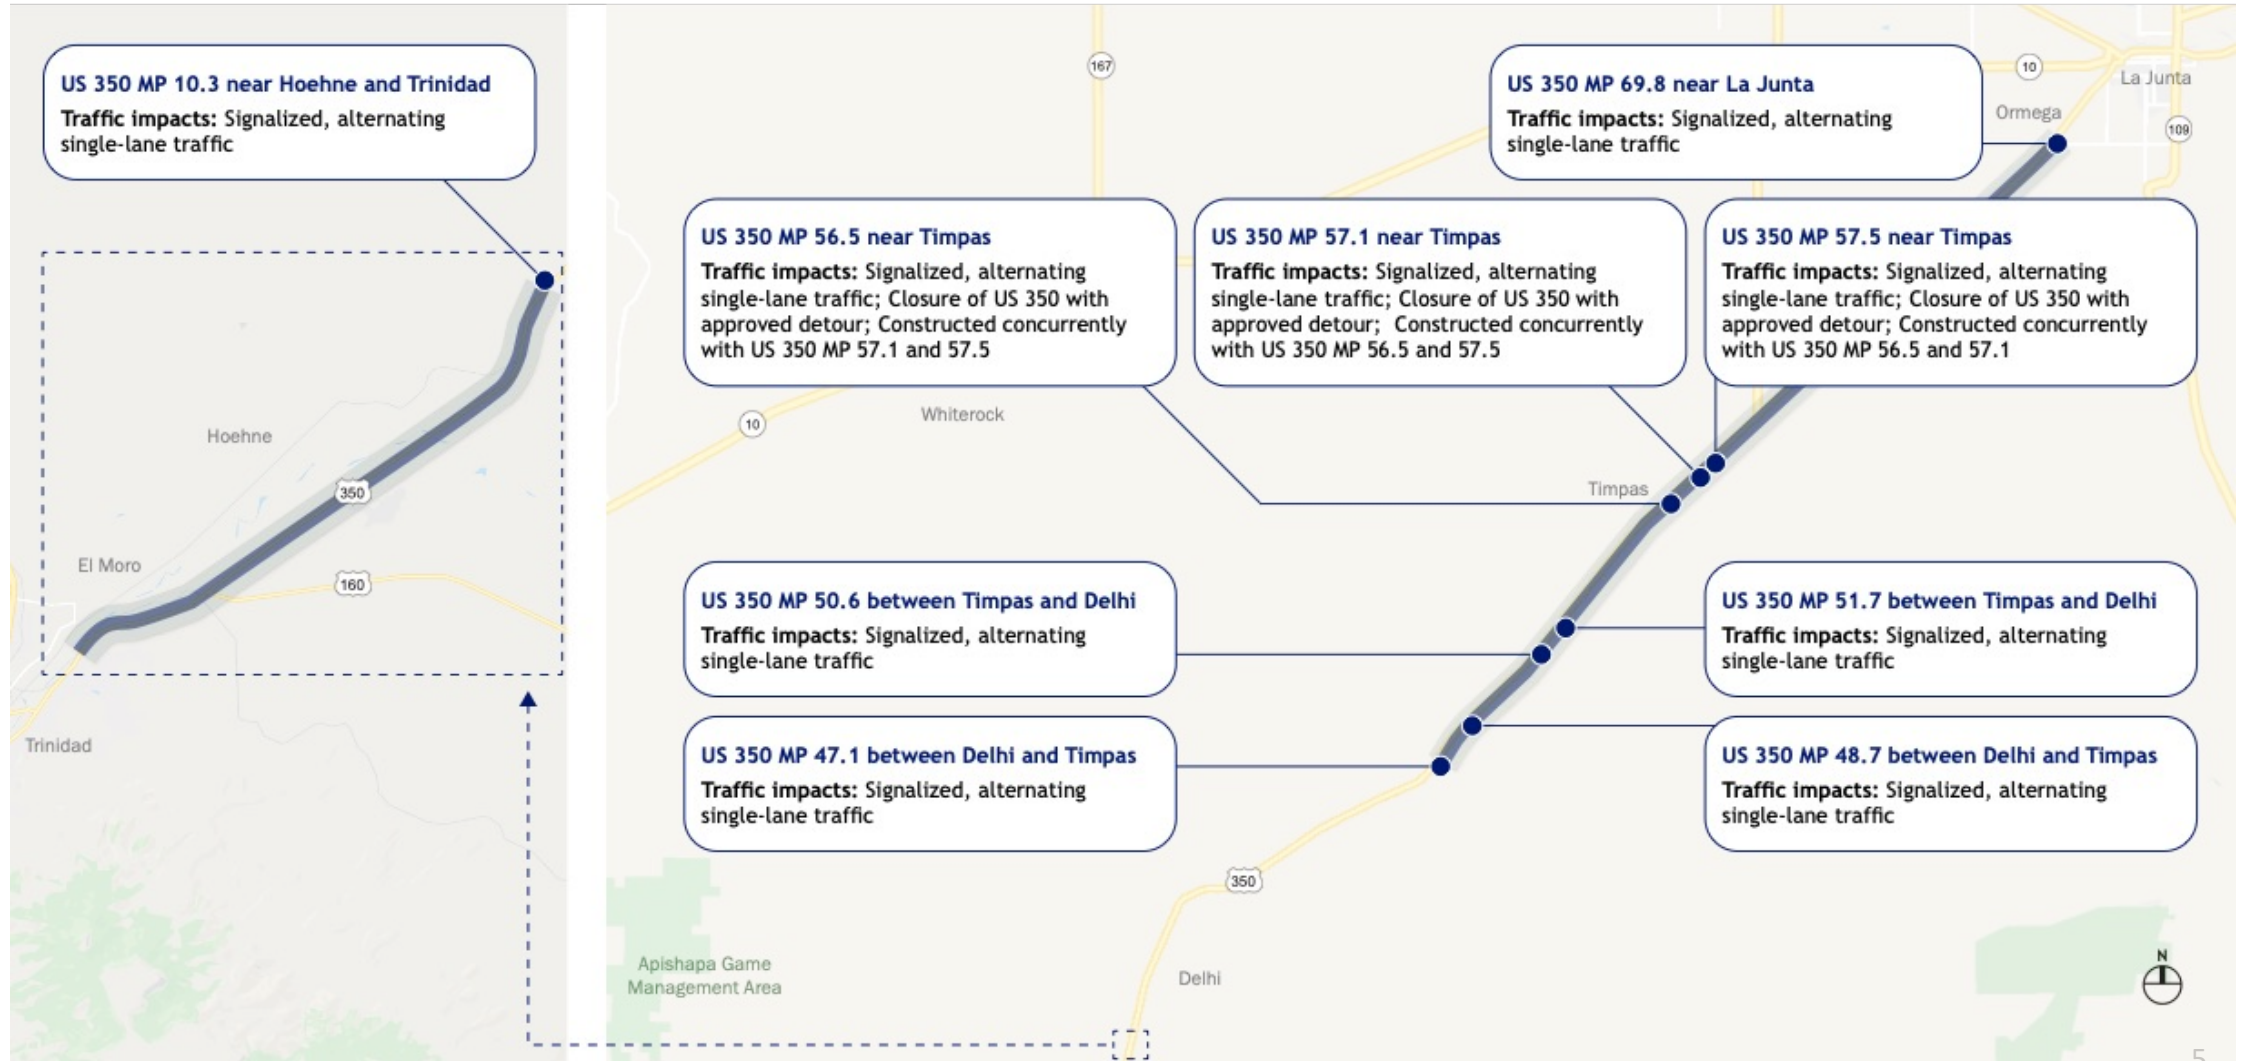

Project Overview - Mountains Region

Region 2 Bridge Bundle Project

Project Overview - Plains Region

Region 2 Bridge Bundle Project

Guffey Pipe Structure

- First structure to be replaced near Guffey at mile point 15.9 on Colorado Highway 9
- Structure is currently two 84” diameter pipes
- We will be replacing it with two ALBCs (aluminum box culverts)
- Construction will begin Monday, Aug. 1 and last approximately three months

Region 2 Bridge Bundle Project

Impacts for Guffey Structure

- Signalized, alternating single-lane traffic
- Project area lane width 11 ft. and shoulder width 2 ft.
- Speed reduced to 25 mph
- Traffic will slow down to 25 mph to the traffic lights before going through the alternating one-way zone
- General work hours are Monday through Friday from 7 a.m. to 6 p.m.
