

Project Overview

What is BRT?

Bus Rapid Transit (BRT) incorporates elements of rail into bus operations, and thus provides a **high-quality, high-capacity, efficient** bus service.

What would BRT do?

BRT would:

- Increase bus frequency
- Improve transit connectivity
- Improve pedestrian infrastructure
- Attract additional transit ridership
- Reduce transit travel time/delay
- Improve transit infrastructure with enhanced stations
- Improve air quality
- Support meeting the State's greenhouse gas reduction goals
