Reimagine RTD System Optimization Plan:

- Addresses the region's near-term transit mobility needs
- Informed by travel patterns, demographics, Title VI, equity analysis, and RTD's workforce and financial capacity
- Informed by over 1,600 public and stakeholder comments
- Annual operating cost approximately \$20.67 million (2029 dollars)

Recommended Alternative Service Plan Considerations:

- Previous study recommendations including RTD's SOP
- Existing and future travel demand and origin and destination travel patterns
- Layover and recovery time for bus operators
- Annual operating cost approximately \$400,000 more than SOP (2029 dollars)

Recommended Alternative Station Location Considerations:

• Addresses recommendations from previous plans

RECOMMENDED ALTERNATIVE

- Builds on existing passenger activity
- Incorporates future ridership projections
- Community goals as defined in previous plans
- Existing passenger activity
- Future passenger activity projections
- Access to stations and speed of service along the corridor
- Considers accessibility for mobility needs
- ADA passenger activity
- Transit transfer and connection points
- Existing and future population and employment
