Memorandum

To: Amy Kennedy

Date: October 2014

Company: Pinyon Environmental, Inc.

Phone: 720-536-4174

From: Thomas M. Bown, PhD

Pinyon Project #: 1167002

Delivery Method: email

Subject: Federal Boulevard Project/paleontological resources

The client requested a new locality search in the projected project area, conducted through the University of Colorado Geology Museum and/or the Denver Museum of Nature and Science to ensure that a complete and up-to-date picture of potential fossil resources in the area is presented in the EA document.

Dr. Logan Ivy of the Vertebrate Fossil Division of the Denver Museum of Nature and Science and Tonia Culver of the University of Colorado Geology Museum (Boulder, CO) were contacted regarding the presence of any fossil localities within the project area. The area given to them for search was "Section 5, T 4 S, R 68 W, Denver County, Colorado."

Neither the Denver Museum of Nature and Science nor the University of Colorado Museum in Boulder house fossil materials of any kind collected from within the proposed project area.
