

Supplement 2 to the Hazardous Materials Technical Memorandum

PREPARED FOR: Colorado Department of Transportation
PREPARED BY: Kay Dry/CH2M HILL
COPIES: Andrea Garcia, Shonna Sam, File 187824_US_24_Corridor
DATE: August 8, 2011

The following text supplements Technical Memorandum for Hazardous Materials.

Strike the following from the first paragraph under Project Alternatives:

The alternatives for the US 24 Project include the "No Action Alternative" and the "Proposed Action". The two alternatives are described below and are included in this TM. ~~because both involve upgrades to the highway may require environmental action depending on their location in relation to the findings of this TM.~~

Strike the following paragraph from the last paragraph under Hazard Assessment Methodology:

~~Due to the length of time before funding is available for construction; interviews, and a comprehensive site visit were not conducted, and research of environmental liens and title records was not performed.~~

Reword the first paragraph under Records Review as follows:

Exhibit 2 presents a summary of the EDR Report results, including the number of sites found for each database searched, EDR site locations are approximate. The full EDR report is included as **Attachment 1** to this TM. **Exhibit 3** shows the general locations of the EDR findings based on Map ID#, the buffer of 1,000 feet from the existing US 24 centerline and the proposed right-of-way buffer. The EDR Report results presented include one mile search distance from the existing US 24 centerline. All of the sites within the one-mile search area were reviewed, and then the buffer of 1,000 feet and proximity to the ROW was to used to futher determine if a site would be considered a REC.

Add to the title of Exhibit 2 "One-mile from the existing US 24 centerline"

Define acronym for RFI under Corrective Action Report, Pueblo Cleaning Corporation. RFI is a Resource Conservation and Recovery Act Facility Investigation.

Modify the last sentence is this paragraph to read "This site is located downgradient and beyond 1,000 feet of US 24 centerline and therefore not considered an REC."

Under RCRA Treatment, Storage and Disposal Facilities list Map ID #13 for Don's Auto Body.

Under Supplemental Databases modify the last sentence of the last paragraph as follows: "Pueblo Cleaning Corporation is located downgradient of the US 24 centerline and therefore is not considered a REC. Daniels Motors Inc. is located outside of the US 24 Project Proposed Right-of-Way, and is not considered to be a REC. "

Under Solid Waste Landfills strike the following sentence "~~Based on institutional knowledge of the area, there is a possibility that a suspected landfill exists at 315 31st Street and is owned by High Country Holdings Inc. This site is outside of the US 24 Project Proposed Right of Way and therefore not considered an REC.~~"

Under Impacts and Mitigation add the following paragraph "If a portion of the Gold Hill Mesa property is acquired for Right-of Way, research should be conducted with the County to determine if there are institutional or engineering controls on the property that require special handling of the soil if it is excavated."

Under Limitations and Exceptions add the following statement after the third paragraph:

The following deviations from the ASTM 1527 standard are noted:

- Interviews were not conducted
- A comprehensive site visit was not conducted
- Research of environmental liens and title records was not performed
- Historical records were not reviewed
- Environmental database search dated August 21, 2008 is past the 180 day mark
