

US 24 PLANNING AND ENVIRONMENTAL LINKAGES STUDY

A transportation study of US 24 between Powers Boulevard (SH 21) and the Town of Ramah is underway. The Colorado Department of Transportation (CDOT) is conducting a Planning and Environmental Linkages (PEL) study to examine improvements for this important corridor. The study will provide a more thorough understanding of the existing and future transportation conditions along US 24. The study will identify socioeconomic, environmental, and resource concerns and opportunities in the corridor and screen a range of improvements to develop an implementation plan for future projects to meet the operational, safety, and capacity needs of the corridor.

COMMENTS

How do you use the US 24 corridor, between Powers Boulevard (SH 21) and Ramah?

- I live here
- I work/shop here
- I commute along corridor

What are your highest priorities for this transportation corridor?

- Vehicular mobility (congestion and delay)
- Pedestrian/bicycle accessibility and facilities
- Access to properties along the corridor
- Safety
- Transit connections
- Other _____

Do you agree with the Draft Purpose and Need for projects along the corridor?

What do you think the purpose of any transportation improvements recommended by this study should be?

What ideas do you have to reduce traffic congestion, improve corridor and intersection operations, and enhance safety for all users along US 24 between Powers Boulevard (SH 21) and Ramah?

Please share your thoughts regarding existing transportation conditions and/or issues along US 24 between Powers Boulevard (SH 21) and Ramah. (Consider traffic conditions, roadway features, environmental and community resources, and pedestrian, bicycle, and transit travel)

Please provide general suggestions and comments regarding the transportation study below.
