

Screening Criteria

The following general criteria used to determine whether or not various transportation alternatives would meet the US 50 project's purpose and need:

- ▶ Would it improve safety?
- ▶ Would it improve mobility for local users of US 50?
- ▶ Would it improve mobility for regional users of US 50?
- ▶ Would it improve mobility for long-distance users of US 50?
- ▶ Would it balance the mobility and access needs of the various users?
- ▶ Would it provide flexibility to meet future travel demands?

Alternatives that meet the purpose and need will be reviewed for environmental “fatal flaws” and a detailed analysis will be presented in the draft Environmental Impact Statement.
