

# US 550/160 Grandview Interchange Connection

## SCOPE:

Complete connection of US 550 to US 160 at the Grandview Interchange.

## BENEFITS:

The US 160 Grandview Interchange is part of long-range planning for enhanced mobility for the entire southwest Colorado region. The interchange is a key component for growth and connectivity to the Three Springs and Grandview community, where a significant amount of growth is occurring. The interchange bridge structures have seen increased use over the past year with La Plata County's and the City of Durango's completion of Wilson Gulch Road, which provides much safer and more efficient access to the area's regional hospital.
