

## **Meeting Minutes**

September 18, 2015

**Opening Comments** – 9:00 Chief Ticer

### **Introductions**

17 of 24 members in attendance, therefore we have a quorum.

**Self-Introductions: Name; Agency, Entity or Interest Represented**

**Legislation Sponsors' Remarks** (if in attendance)

None in attendance.

### **Public Comments**

None

### **Minutes of Previous Meeting**

Casias, second by Fisher. All in favor, motion passes.

### **Statistics**

#### **State Fatality Numbers (CDOT) – Glenn Davis**

Data through 9/13/15

- 372 Fatalities in 2015 through 9/13/15
- 349 Fatalities in 2014 through 9/13/14
- Increase of 7%
- 20 occurred in Jefferson county
- 12 Arapahoe county
- Biggest month was March
- 32% of fatalities alcohol related
- Haven't made an impact of where we want to be so far this year.
- Motorcycle fatalities have really gone up this year, there were 11 in a two week period

### **Media Relations & Significant Upcoming Events**

Sam Cole, CDOT

- Labor day – a lot of outreach
- Three events in LoDo over Labor Day weekend. Try out personal breathalyzers, works with smart phone. It was a big wake up call for a lot of people that didn't realize that they were over the limit with a couple of drinks.
- 750 people come through, had really good conversations with people about drinking and driving.
- Good interaction with Hispanic outreach
- CSP Trooper Alvarado has been an excellent spokesperson for the Hispanic community

Laura Sonderup, Hispanidad

- Hit events and festivals really hard this summer so that we had one on one conversation in language.
- Mexican Independence Day – 120,000 people. Trooper Alvarado was on stage in uniform. The report he has with the community is amazing.
- 215 LE agencies will be getting a supply of Spanish brochures with impaired driving and seat belt messaging. Thanks to Captain Fisher for suggesting the idea.
- Ticer – Apps with phone, are you finding that awareness is being raised that people are seeing that people are surprised that they are impaired.

## **Task Force Business & Presentations**

### **Vacant Positions**

Chris Samson, Position to replace Off-Premise Alcohol Retail Business.

Groff – Consider including a position for member of the medical community in the future.

Ticer – Agree with you, certainly they can come and participate. If we have one of those opportunities in the future to make the statutory change.

### **Program Management & Strategic Planning – Glenn Davis, chair**

- Looking at same recommendations from last year.
- Primary seat belts
- Preliminary devices to detect use of marijuana
- Type of statistical tracking for drug impairment
- Have heard there may be a bill for a 24/7 program
- Subject to alcohol testing 24/7, jailed if impaired

### **Criminal Justice – Deputy Chief Steve Johnson, chair (not in attendance)**

Whitney – meeting prior to October meeting to fine tune recommendations

### **Prevention – Ellen Anderson, chair (not in attendance)**

See hand out

Lemley- Concerns for it being a state position that it may take more time to get the position in place

Fisher – This is important for promoting an alternative ride. Not sure if there is any other state working on this. Important to find where this position could be housed.

Davis – Expressed concerns for funding for position at CDOT.

Wells – Suggested adding content for impaired driving to individuals that get minor in possession.

Casias – Suggested a better place to put the minor in possession (MIP) possible impaired driving training into 30 hour DMV requirement to get permit.

Hanson – The online doesn't stick as much. There should be an additional thing to teach this age group.

Casias – Licensing component – Alive at 25 program.

Tracy – Weld County Drive Smart – it is about driving. Larimer County Party Program – it is about partying and choices you make. Dare You to Move is more about what is driving you to make self-defeating choices. The prevention groups need to coexist and collaborate together.

Ticer – Maybe see if there is another fit for where this position could exist, or maybe make language more open. Second part, love what Judge Casias is saying, tying impaired into

permit program. Perfect audience to get that. We know online learning isn't going to be as robust. Be aware that some areas may not have in classroom format and only have online options.

**Impaired Driving Intervention and Treatment** – Christine Flavia & Sue Parker (co-chairs)

- Would like to acknowledge all the other people that have been working hard the last three months on developing the structure for the felony DUI. Recognizing that current structure while good, there are some gaps for that specific population. Entertained changing the treatment structure for 4+ DUI offenders, adding a level.
- OBH can license for proposed new level. If it was a fifth track, it could be more of the same. We want it to be very different, very distinctive, and assessment driven.
- Established a structure – still in draft form. Will go into second phase of rule revision, expect to come out next spring.
- Length of time – 18 months with 180 hours of services. Currently 110 hours over 13 months.
- Battery of screening and assessment tools
- Population TBI, problems with cognitive functioning, grief/loss issues, co-occurring disorders
- New tool available – CARS – does an excellent job of looking at co-occurring disorders.
- Will select a set of tools to provide an assessment
- Very excited about it,
- October 7 at OBH
- Draft of Level III rules right now, in final stages of tweaking those before they go out to the DUI stakeholder community that will be open for public comment.
- Recognize need for need for first, second, and third time offenders, however this is where we need to start. If we try to launch this level of treatment for all offenders, we won't be successful.

Gregarin – In terms of Level III – any idea of what that would look like so that we can pass on to his clients?

Flavia – Will be assessment driven. Unresolved issues that don't fit well into standard DUI treatment. Much more individualized.

**Communication** – Sam Cole, chair

- See media update

Break: 10:00

Reconvene: 10:15

**Data & Program Evaluation** – Nicole Richmond (not in attendance)

Jeff Groff – See Power Point

Action: Hahn will e-mail out flow charts to distribution e-mail list

Casias – quick way to get number of people charged, run it by DUI statute charges

Groff – As we were going through these meetings, if the DA doesn't file that charge, would we be missing a chunk?

Casias – Most are served by summons, the DA decides how they are going to disposition

Flavia – OBH does not get lab results, it is based on what probation gets from the police report.

What treatment gets is information from probation that is entered into ADDSCODS. Probation is entering it into ADDSCODS.

## **Legislative Outreach** – Fran Lanzer, chair

Looking at setting up a call very soon. Will try to get legislators to attend November meeting.

### **Lightning Round Update**

Fisher – Doing work to provide training to port of entry officers that might need to have some sort of law enforcement intervention. Colorado State Patrol's 80<sup>th</sup> anniversary next week, open house at academy. Anyone is welcome to attend.

Elliott – Working on rule making hearings this summer. Production management, how much can facilities grow? A lot about testing, ownership issues. Don't have final rules in hand yet, hopefully will have in another month or two. Denver has scheduled a Denver working group to work on bonding issues. Bonding companies are ditching the industry in mass. Looking for a city solution. Issues about pesticides. Whether moratorium in Denver will continue. No new recreational stores allowed, only if had medical license. Trying to decide if moratorium should expire or continue. Retail marijuana program is scheduled to sunset. It will be on the table with lots of opportunities to make it.

Hanson – Reaching audiences, instead of radio, should look at online radio (i.e. Pandora.) There is currently a distracted driving ad on Pandora that is a good one. Feels it speaks to his age bracket.

Davis – We do hit that market and can have Sam bring in some examples.

Ticer – Wanted to point out, I am not in that demographic, but listens to Pandora. It is reaching other age brackets as well.

Tracy – Channel 9 News will be doing a story of her presentation at a high school. Meeting with educators today, highlighting the differences between her programs workbook and what else is available. Please feel free to reach out if you have questions on what Dare You to Move program is.

Lanzer – 10/10/15 – new Walk Like Madd event in Greeley. 11/7/15 – save the date notice for candle light vigil for victims and survivors of impaired driving in Lakewood 4:30-6:30pm.

Timken – Busy with implementing working on revising material. Modifications on assessment instruments. Having a national training in Las Vegas area in early December. Adolescent driving impaired training in the next week. Working on getting more interlock counsel training.

Gregarin – Partnering to help people with criminal convictions that might be eligible for expungement or sealing of records for individuals required to register for juvenile offenders. For the next 2-3 months a lot of free volunteer lawyers available helping out on the front range to help people who might be suffering from permanent convictions that might be able to help. Denver Post did a story on. If anyone needs help on, let him know.

Lemley – DOR LE along with industries, all three tiers are coming together 10/6/15-10/7/15 Colorado Alcohol Symposium. How to be compliant with state regulations and how to work together. If anyone is interested, let him know. Will be held at Metro State University.

Mitchell – DOR, the driver license system – just started development of Driver Record Identification Vehicle Enterprise Solution (DRIVES) – Vendor, Fast Enterprises, is working on. 24 month process. Began on September 1<sup>st</sup>, will keep you posted.

Hendricks – Marketing materials highlighting noduicolorado website available, take as many as you like. Please see handout.

Sonderup – Trooper Alvarado will be able

Parker – September is National Recovery month. If you know of someone who is in recovery, give him words of encouragement. Walk, bike ride

Wells – OBH is hosting a recovery forum 9/29/15 – all about Young People in Recovery (YPR). Will send flyer to Brenda to distribute

Flavia – Catalog for the marketing materials, see hand out. If you or people you know want to order materials, please e-mail [peast@webbstrategic.com](mailto:peast@webbstrategic.com)

Lamson – Looking forward to filling that gap for representing the off premise alcohol

Whitney – Have had first five felony DUIs in Weld County since 8/5/15. Seen a wide variety of individuals.

Casias – Have had some significant felony and serious injury hit and run. They think alcohol was involved in both of them. It has shaken his community. Anxiously awaiting Jenn Knudsen coming to Judicial conference. There are a lot of questions. Judicial branch is ready to take notice.

Davis – 10/1/15 – CDOT is transferring to POST.

Nixon – Thank Sam for his efforts for his success on drunken driving campaign. Would like to see how it translates to drugged driving. Acquire funding for DUI drugged driving campaign for prescription drug use. Have talked to some legislators. Reached out to governor's office to discuss issues and opportunities as well.

Kingery DUI court training on 9/28/15, contact her if you are interested in learning more on that. Five new jurisdictions that have just started a DUI court .

Robnett (Cannabis Patients Alliance) – Proud of their alliance and collaborative relationship with child endangerment. Keeping kids safe from substances. Talks about different phases of life from pregnancy all the way to teen years. Brought some cards if you all could take a look at. It is a work in progress.

Menjivar – Fort Carson military base, have taken home over 2,300 people since Dec 1. Their program does it every Friday and Saturday night.

Motion to adjourn: Fisher, second by Lanzer.

Adjourn: 11:49 am

Next Meeting: Friday, October 2, 2015

Colorado Department of Transportation  
4201 E. Arkansas Ave.  
Auditorium Conference Room  
Denver, CO 80222

**In attendance:**

Chief Robert Ticer, Avon Police Department  
Glenn Davis, Colorado Department of Transportation  
Sam Cole, Colorado Department of Transportation  
Captain Ray Fisher, Colorado State Patrol  
Brenda Hahn, Colorado State Patrol  
Andrew Lemeley, New Belgium Brewing  
Katie Wells, Office of Behavioral Health  
Christine Flavia, Office of Behavioral Health  
Webster Hendricks, Office of Behavioral Health  
Sue Parker, Colorado Alcohol Addiction Professionals (CAAP)/ New Journey to Wellness  
Ben Mitchell, Colorado Department of Revenue, Driver Control  
Judge Ed Casias, State Court Administrators Office, Courts  
Amy Kingery, State Judicial, SCAO  
Dr. Dave Timken, CIDRE  
Ben Whitney, Weld County District Attorney's Office  
Fran Lanzer, MADD Colorado  
Jennifer Tracy, Victim  
Amber Gray, Victim Family Member  
James Hanson, Student Under 24

Michael Elliott, Marijuana Industry Group  
Daniel Gagarin, Public Defender's Office  
Jeff Groff, Colorado Public Health & Environment  
Ronn Nixon, iComply, LLC, Cannabis Policy Advocate  
Ed Wood, DUID Victims Voices  
Jennifer Knudsen, TSRP, Colorado District Attorneys Council  
Ashley Schluck, Wyoming Department of Transportation, Highway Safety Office  
Jack Reed, Colorado Department of Public Safety, Division of Criminal Justice  
Laura Sonderup, Hispanidad  
Shannon Westhoff, Hispanidad  
Bob Batchelor, Elix  
Chris Lamson, Coloradans For Safety  
Liz Couture, Colorado Safety Association  
Teri Robnett, Cannabis Patients Alliance  
Edgardo Menjivar, Fort Carson Army Substance Abuse Program

**Prevention Work Group Proposals (\*\*DRAFT 09/17/15\*\*) to the entire CTFDID (Colorado Task Force on Drunk and Impaired Driving).**

The Prevention Work Group offers the following three suggestions to the CTFDID for inclusion in the 2015 Annual Report.

- **Create staff position (or partial position) of “Alternative Ride Liaison” within CDOT, Division of Transportation Safety who will:**
  - Gather information on all types of existing alternative ride programs. Information to include both non-profit rides and for-profit ride services, in Colorado and nation-wide. Various funding sources would be an important part of this library.
  - Gather information about all the concomitant issues associated with alternative rides that might be barriers such as overnight parking, retrieving vehicle the next day, parking tickets, etc..
  - Organize and cross-reference this information in a manner such that anyone in any jurisdiction in Colorado can access it specific to local needs: by population, by rural/urban, by for-profit/non-profit, by availability (all the time/only certain hours of the day/only certain days), etc..
  - Provide information to any jurisdiction, when requested, via e-mail, phone, and in-person.
  
- **Support the Colorado Office of Behavioral Health in revising their required treatment rules regarding services to youth who receive their first Minor in Possession offense to include education about drinking/impaired driving in the required education classes.**
  
- **Promote and collaborate with already-existing community-based programs that work towards the prevention of drunk/impaired driving. Dare You To Move, Larimer County Party Program, and Weld County Drive Smart are examples of this type of program.**

# CTFDID: Data and Evaluation Subcommittee

## Members:

Janet Allbee (CSP)

Lisa Barker (CDPHE)

Carolyn Berry (POST)

Susan Colling (CSC)

Jeff Groff (CDPHE)

Brenda Hahn (CSP)

Benjamin Mitchell (CDOR)

Jack Reed (CJD)

Nicole Richmond (CDPHE)

Ashley Brooks-Russell (CSPH)

Dr. David Timken (CIDRE)

Jackie Urioste (CDHS)

Ed Wood (DUID Victim's Voices)

# Objective

- To answer the following evaluation questions:
  - What is the DUI/DUID prevalence of.....**
  - a) Impaired drivers cited by law enforcement for DUI/DUID?
  - b) Impaired drivers involved in a motor vehicle crash resulting in no injury?
  - c) Impaired drivers involved in a motor vehicle crash resulting in an injury?
  - d) Impaired drivers involved in a motor vehicle crash resulting in a fatality?
  - e) What is the impairing substance in each DUI/DUID case?

# Process

1. **RESEARCH** - The DUI/DUID process from stop to disposition.
2. **OUTLINE** - The DUI/DUID Case Lifespan.
3. **EVALUATE** - The current sources of critical data points.
4. **IDENTIFY** – The gaps in data collection.
5. **ASSESS** - The practical and realistic solutions.
6. **RECOMMEND** – The specific changes to current processes.
7. **COLLECT** - The relevant data in one centralized location.
8. **SHARE** – The data with stakeholders and partners.
9. **EDUCATE** – The public and elected officials.

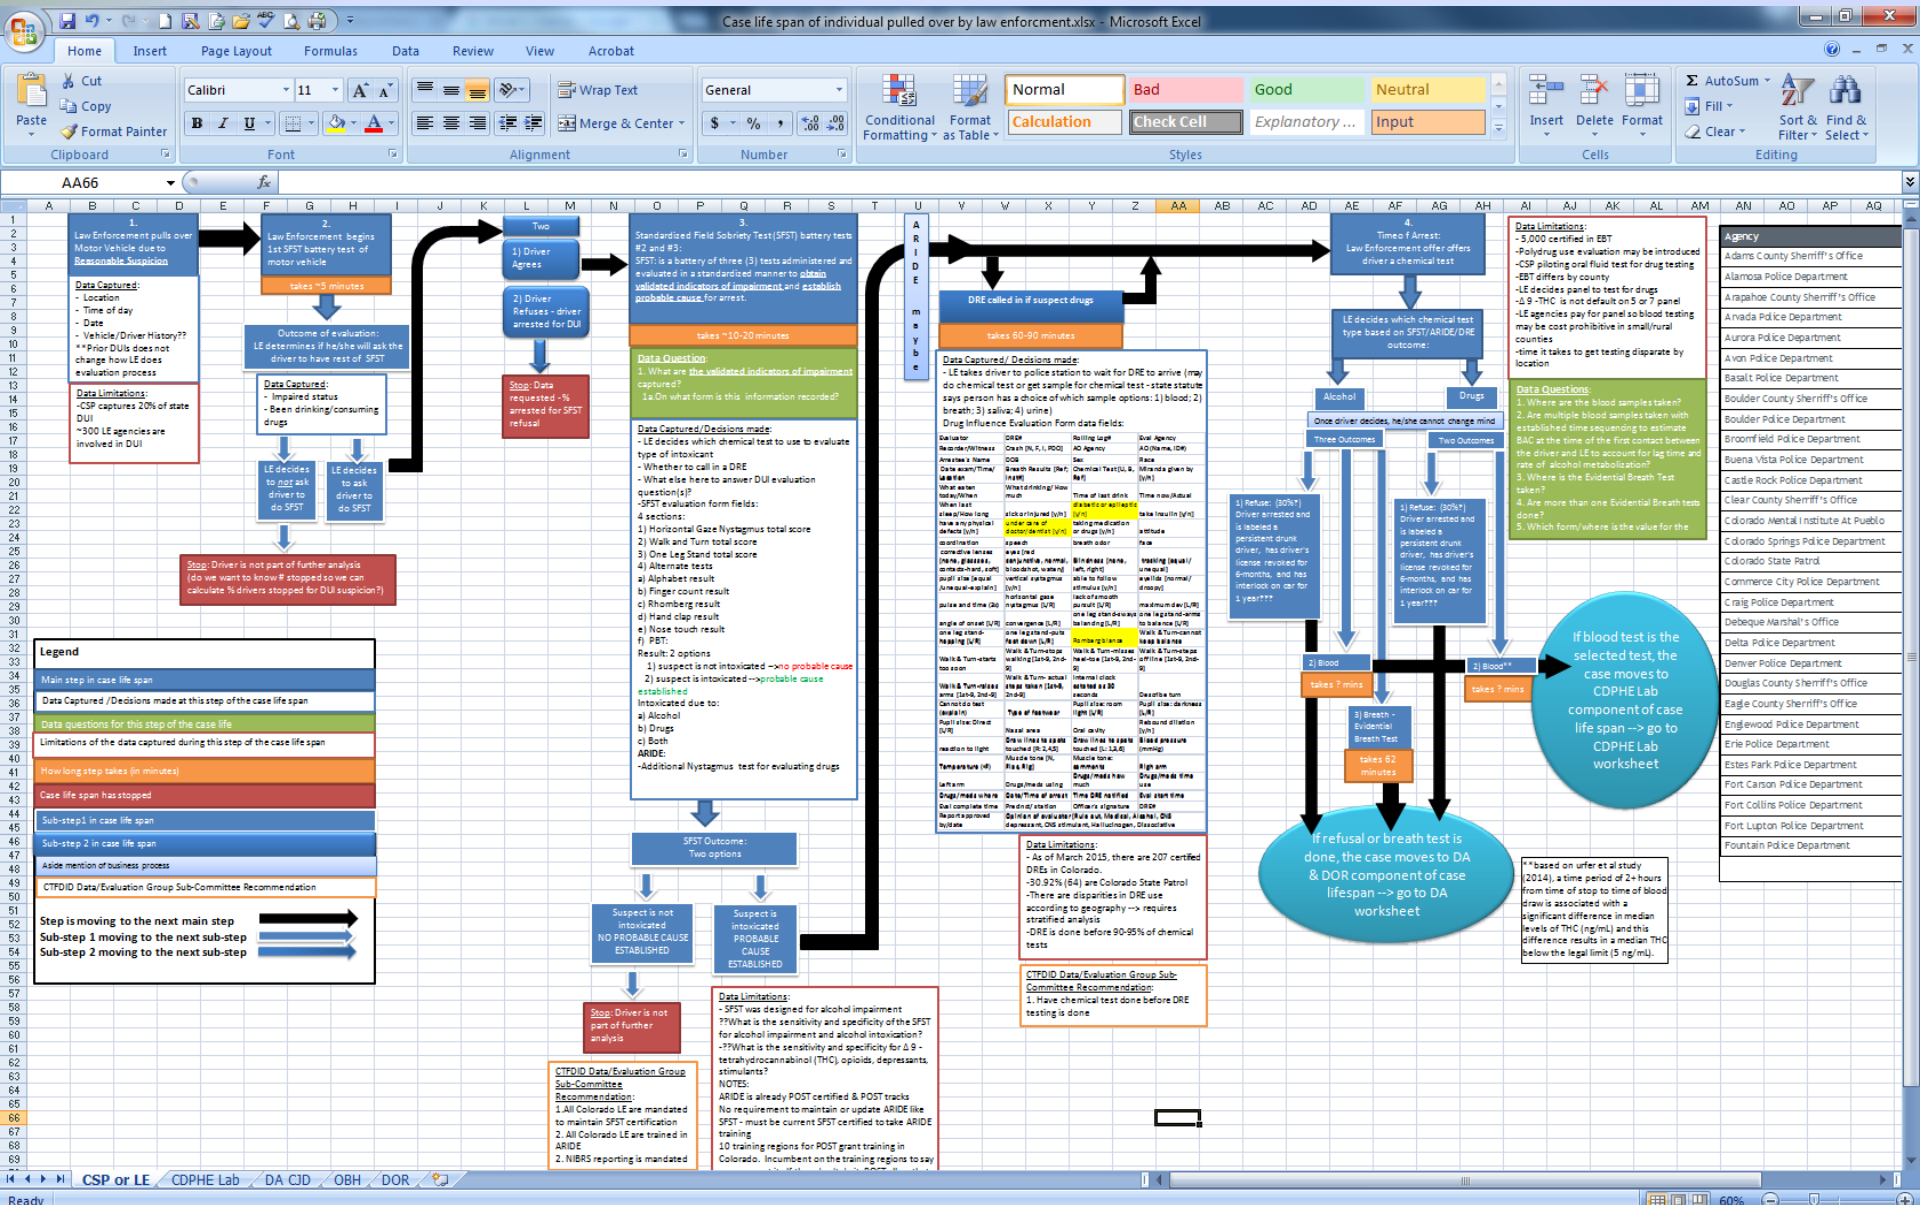

# Complexity

- Colorado's DUI/DUID process is highly complex and requires a numerous state agencies and public engagement to reduce drunk and impaired driving in our state.
  - Law Enforcement
  - State Judicial
  - Department of Revenue
  - Department of Transportation
  - Office of Behavioral Health
  - Department of Health
  - Elected Officials
  - Colorado Citizens
  - Private Entities
  - Other State and Federal Partners

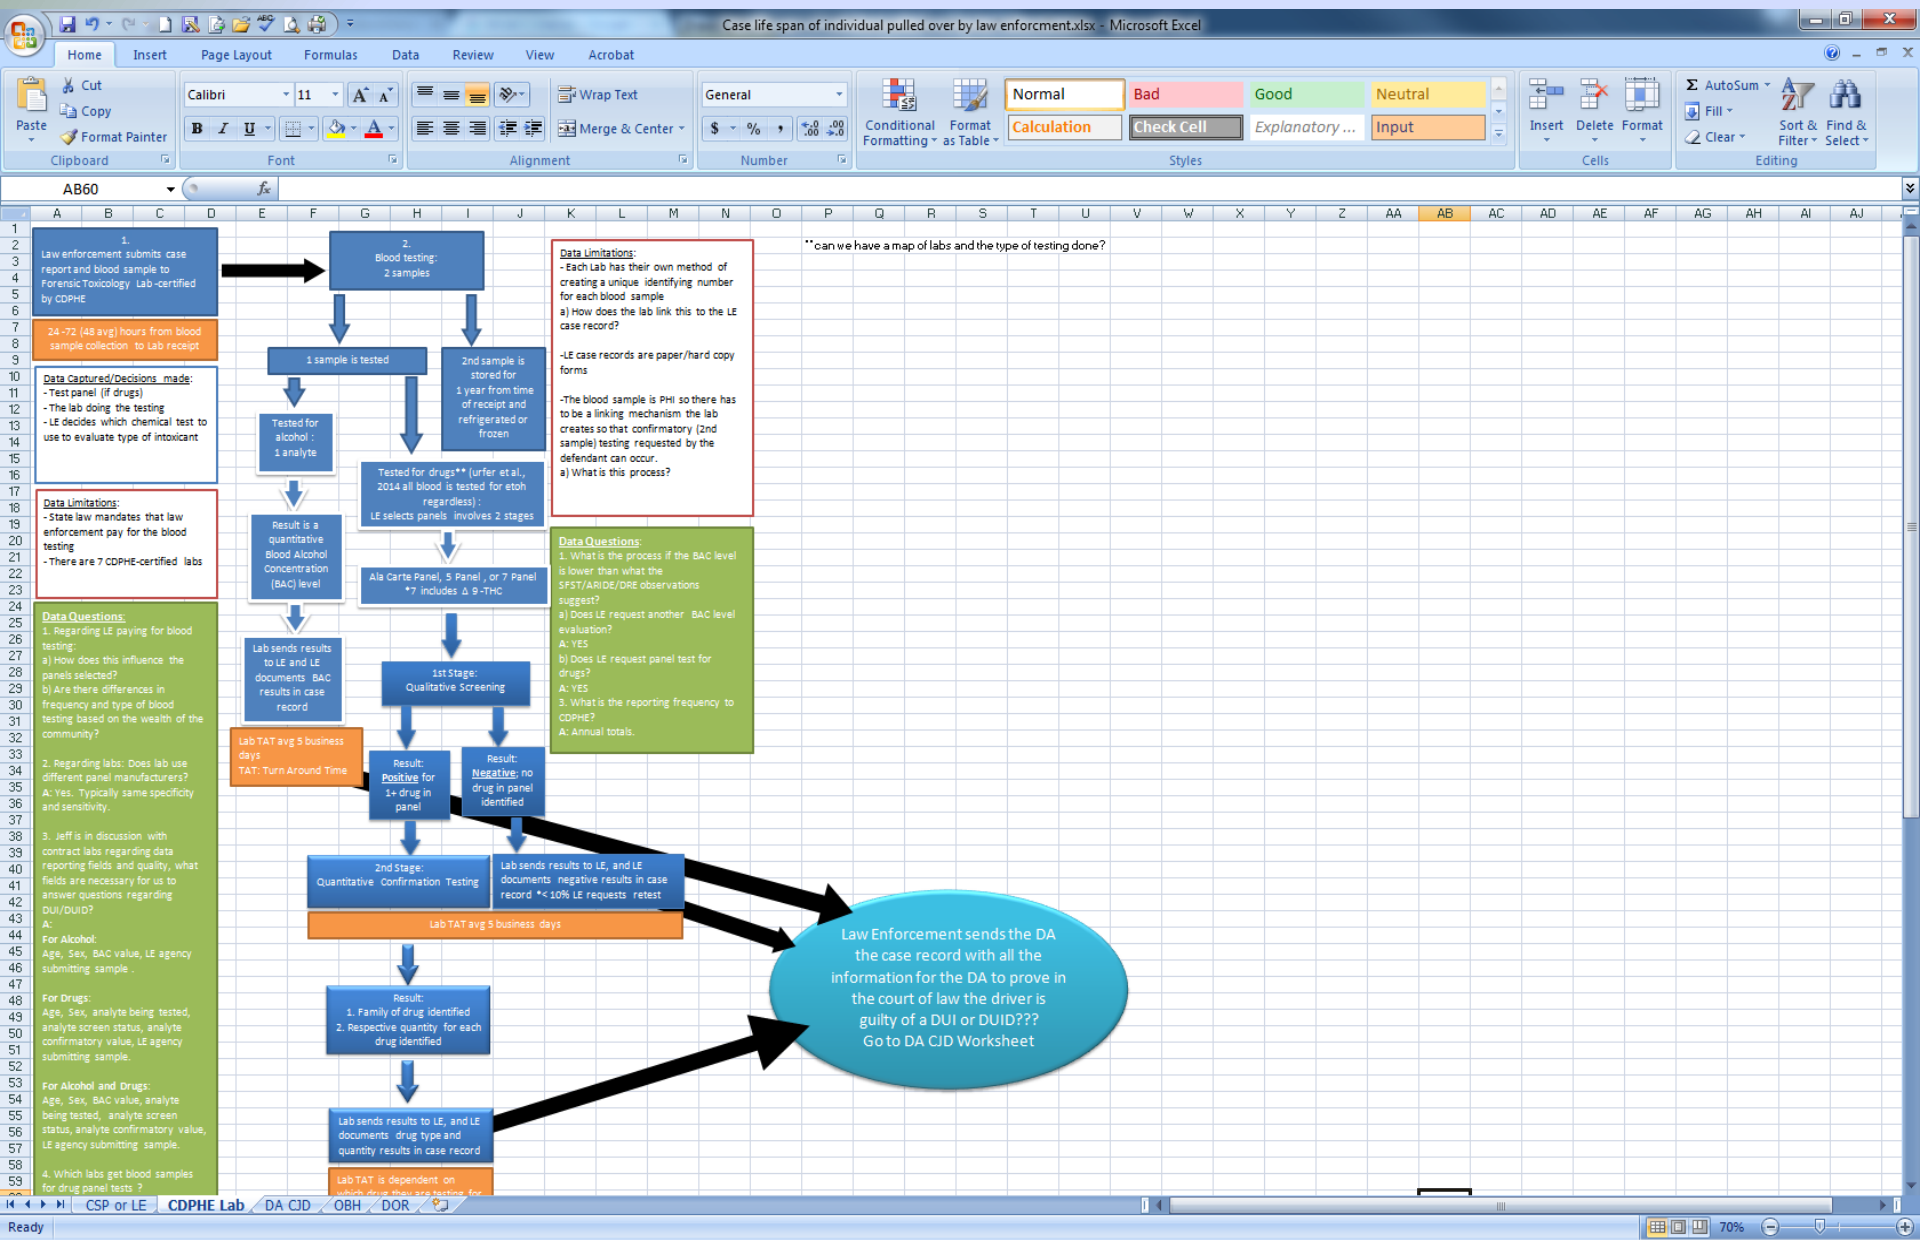

# Challenges

- 5 different state agencies involved in the process for 1 case
- Data challenges
  - Incompatible and Outdated databases that are not able to always communicate together.
  - Paper (faxes, copies, written reports)
    - Example: BAC levels sent to probation
  - Unique identification numbers for each case within agencies not shared across agencies
    - Example: The DA assigns unique identifiers for each case based on agency case #, court case # (this makes it hard to link court data with driver's license data)
  - Jurisdiction of who “owns” the data
    - Does driver own data on laboratory work?
    - Does driver own data on driver control records?

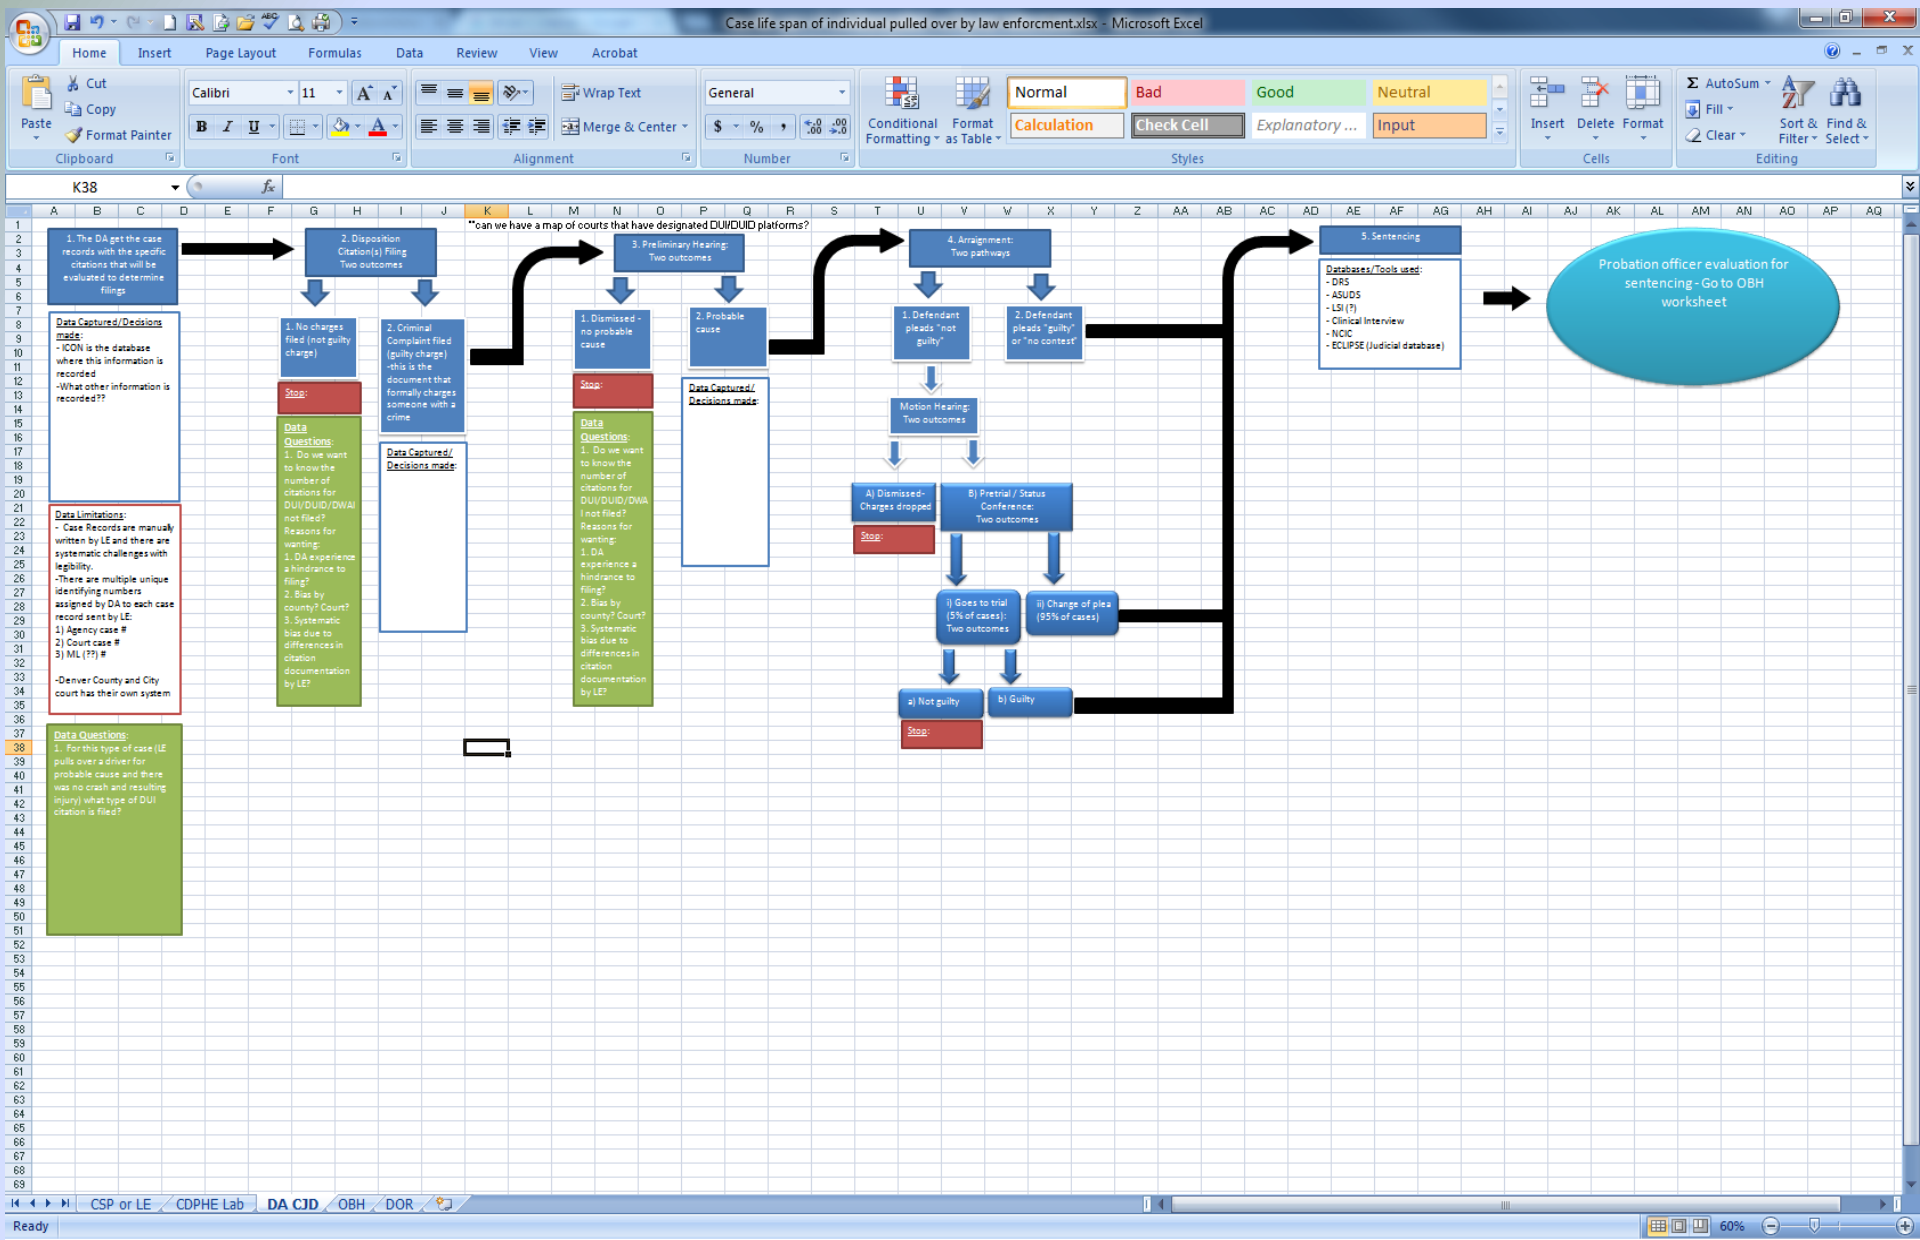

# Law Enforcement: Business steps to determine probable cause for DUI/DUID

# Forensic Toxicology Laboratory Testing: Business steps to quantify sources of impairment

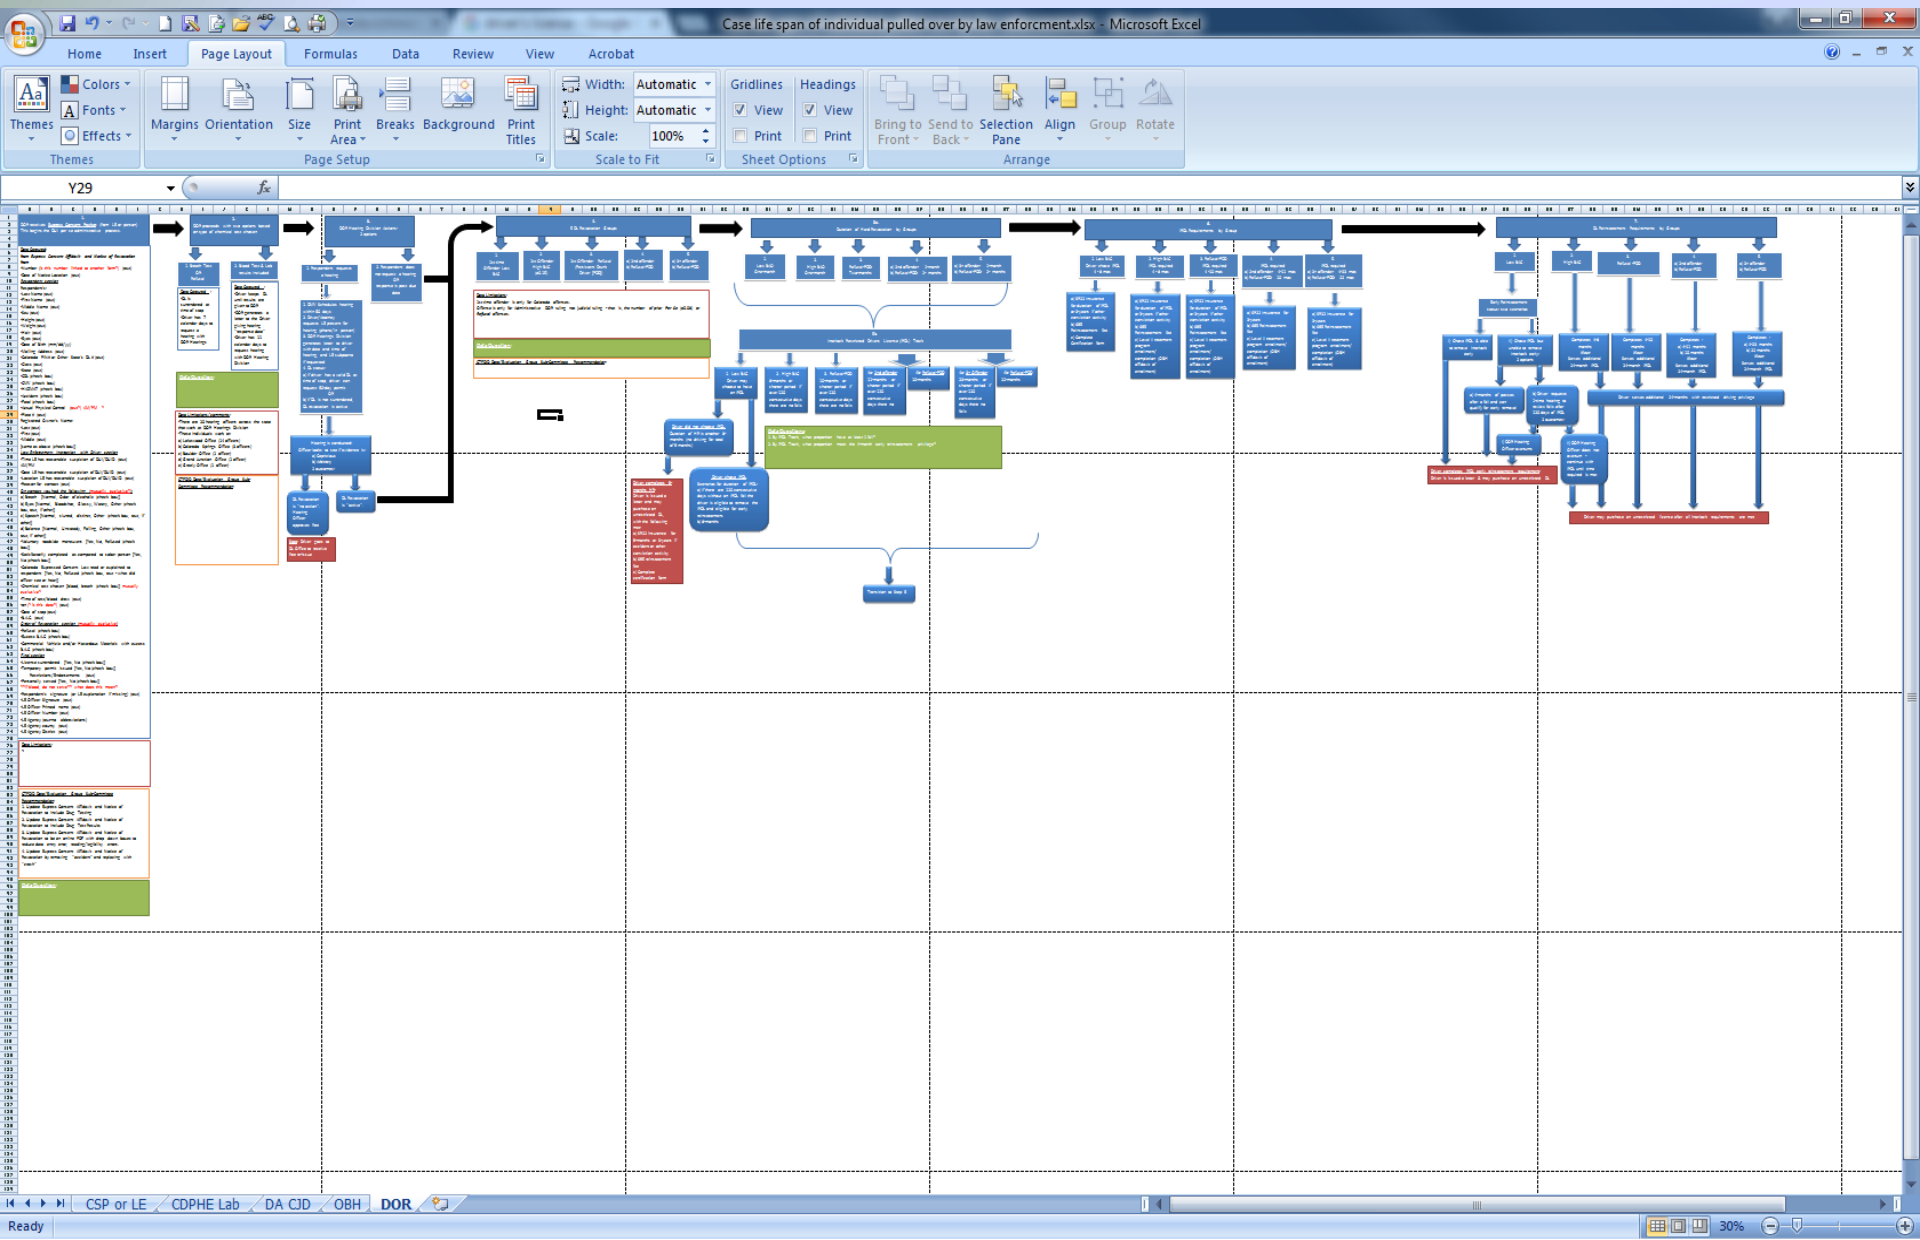

# Colorado Judicial Court: Business steps to establish determination and treatment

# CDOR, DMV, Driver Control, Interlock Program: Business steps of administrative license restrictions

# Office of Behavioral Health: Business steps for DUI/DUID treatment

### 1. Determination of Education Treatment Placement Level for DWI/DUI offenders

SOA

1.1 Probation officer conduct DWI/DUI evaluations

1.2 Probation officer conduct DWI/DUI evaluations

1.3 Dr in front of judge

### 2. Treatment Plans

Level I	Level II.A	Level II.B	Level II.C	Level II.D
Data Custodian: Minimum Hours (12) Minimum Weeks (1-6)	Data Custodian: Minimum Hours (24) Minimum Weeks (1-6)	Data Custodian: Minimum Hours (24-42) Minimum Weeks (1-6)	Data Custodian: Minimum Hours (24-48) Minimum Weeks (1-6)	Data Custodian: Minimum Hours (24-48) Minimum Weeks (1-6)

Complete treatment - Individual receives affidavit of enrollment to present to the DMV to reinstater DL privileges - go to DOR worksheet

### DUI/DWI Reporting System (ORS)

The OHS and the resulting DUI/DWI Referral Summary are used by DMV to collect Level I and Level II education and treatment data on persons arrested for DWI, DUI, DuI, and DuD.

The OHS provides the following information:

- 1) Client's treatment enrollment
- 2) Treatment compliance
- 3) Treatment discharge status
- 4) The following reports (with corresponding data quality control/level II assurance parameters in place):
  - a) Judicial (ORS-Judicial (Read only), Judicial-NORS (Read only))
  - b) The probation department(s) (PT)
  - c) The OHS Division of Motor Vehicles and Hearings section (ORS - DMV (OTS Package), DMV-NORS (Read only))Revised under the treatment management system (TMS)

### DUI/DWI Reporting System (ADCCOS)

ADCCOS is one of the primary client level data collection instruments used by the DMV of the COMS. ADCCOS should be completed at:

- a) Time of admission (first face-to-face therapeutic contact with a clinician) to any modality of substance abuse services AND
- b) Time of discharge from that modality of substance abuse services

Should a client transfer between modalities (e.g., go from residential to outpatient) or from one agency to another with a different licensing number, the clinician must complete a discharge ADCCOS before the client may be admitted to the second modality or agency and the modality of admission ADCCOS is completed.

ADCCOS is a mandatory

### ADCCOS Data Collection - Group Self-Community Assessment

Add fields in ADCCOS that probation officers will need (do not have access to ADCCOS)

ADCCOS will require (dependent status (inpatient/outpatient) and overall level of inpatient)

Types of sample tests (Blood, urine, etc)

Number of samples tested (per test)

Time sample taken

Alcohol test status

Alcohol test result

SAC test / Positive

Category of drug tested

Category and individual types of drug tested positive

Quantity of drug(s) found

### SO Outcomes

1) Level I Education	2) Level II Education	3) Level II Therapeutic Education	4) Level II Therapeutic Education	5) Level II Therapeutic Education	6) Level II Therapeutic Education
Data Custodian: SAC ID 10 AND -No prior clinical indicators OR -SAC ID 10 AND clinical indicators (DSVI-6) AND -No prior	Data Custodian: SAC ID 10 AND -No other clinical indicators (DSVI-6) OR -SAC ID 10 AND clinical indicators (DSVI-6) AND -No prior	Data Custodian: SAC ID 15 AND clinical indicators (DSVI-6) OR -SAC ID 15 AND clinical indicators (DSVI-6) AND -No prior	Data Custodian: SAC ID 15 AND clinical indicators (DSVI-6) OR -SAC ID 15 AND clinical indicators (DSVI-6) AND -No prior	Data Custodian: SAC ID 15 AND clinical indicators (DSVI-6) OR -SAC ID 15 AND clinical indicators (DSVI-6) AND -No prior	Data Custodian: SAC ID 15 AND clinical indicators (DSVI-6) OR -SAC ID 15 AND clinical indicators (DSVI-6) AND -No prior

### ADCCOS Data Custodian (7 elements required field) As of January 6, 2009

CLIENT INFORMATION SECTION

1. Client Last Name (received from judicial, read only)
2. Client First Name (received from judicial, read only)
3. Client Middle Initial (received from judicial, read only)
4. Date of Birth (mm/dd/yyyy) (received from judicial, read only but if blank or all zero, the DOS may be entered)
5. "Moral Security Number" (received from judicial, read only but if all zero, the DOS may be entered)

EVALUATION/REFERRAL INFORMATION SECTION

6. Evaluation Date (entered/pulled with today's date; may be entered)
7. Evaluation Method (received from judicial from user's log ID)
8. Referral Evaluation - User is to select the name of the probation officer from a drop down menu; this is a look-up table filled based on the value from item 27
9. Court Case Number (received from judicial, read only)
10. "Courtday Evaluation Changes" (this will be auto-added and disabled if the user logs into the system from a different judicial district than the court case being pulled)
11. "Courtday Evaluation for Judicial District" (this will be auto-added with the judicial district where the case resides if the user log into the system from a different judicial district than the court case being pulled)
12. "Moral Security Number" (received from judicial, read only)

NOTE: This is required if ACE is checked.

### ADCCOS Data Custodian (7 elements required field) As of January 6, 2009

TREATMENT SECTION

43. Treatment Team Assigned (duh is this not required?)
44. "SOA" level of service indicated:
  - a) Level II Education
  - b) Level II Therapeutic Outpatient & Education
  - c) Level II Therapeutic Residential Treatment & Education
  - d) Level II Therapeutic Residential Treatment & Education
  - e) Level II Therapeutic Community & Education

NOTE: This is not required if, under state 1, item 437 is checked on a value of 88 is recorded for item 436.

45. "Treatment/Referral Treatment":
  - a) Level II Education
  - b) Level II Therapeutic Outpatient & Education
  - c) Level II Therapeutic Residential Treatment & Education
  - d) Level II Therapeutic Residential Treatment & Education
  - e) Level II Therapeutic Community & Education
46. "Treatment/Referral Treatment":
  - a) Level II Education
  - b) Level II Therapeutic Outpatient & Education
  - c) Level II Therapeutic Residential Treatment & Education
  - d) Level II Therapeutic Residential Treatment & Education
  - e) Level II Therapeutic Community & Education
47. "Treatment/Referral Treatment":
  - a) Level II Education
  - b) Level II Therapeutic Outpatient & Education
  - c) Level II Therapeutic Residential Treatment & Education
  - d) Level II Therapeutic Residential Treatment & Education
  - e) Level II Therapeutic Community & Education

NOTE: This is not required if, under state 1, item 438 is not checked.

48. Soterized Treatment:

- a) Level II Education
- b) Level II Education

### ADCCOS Data Custodian

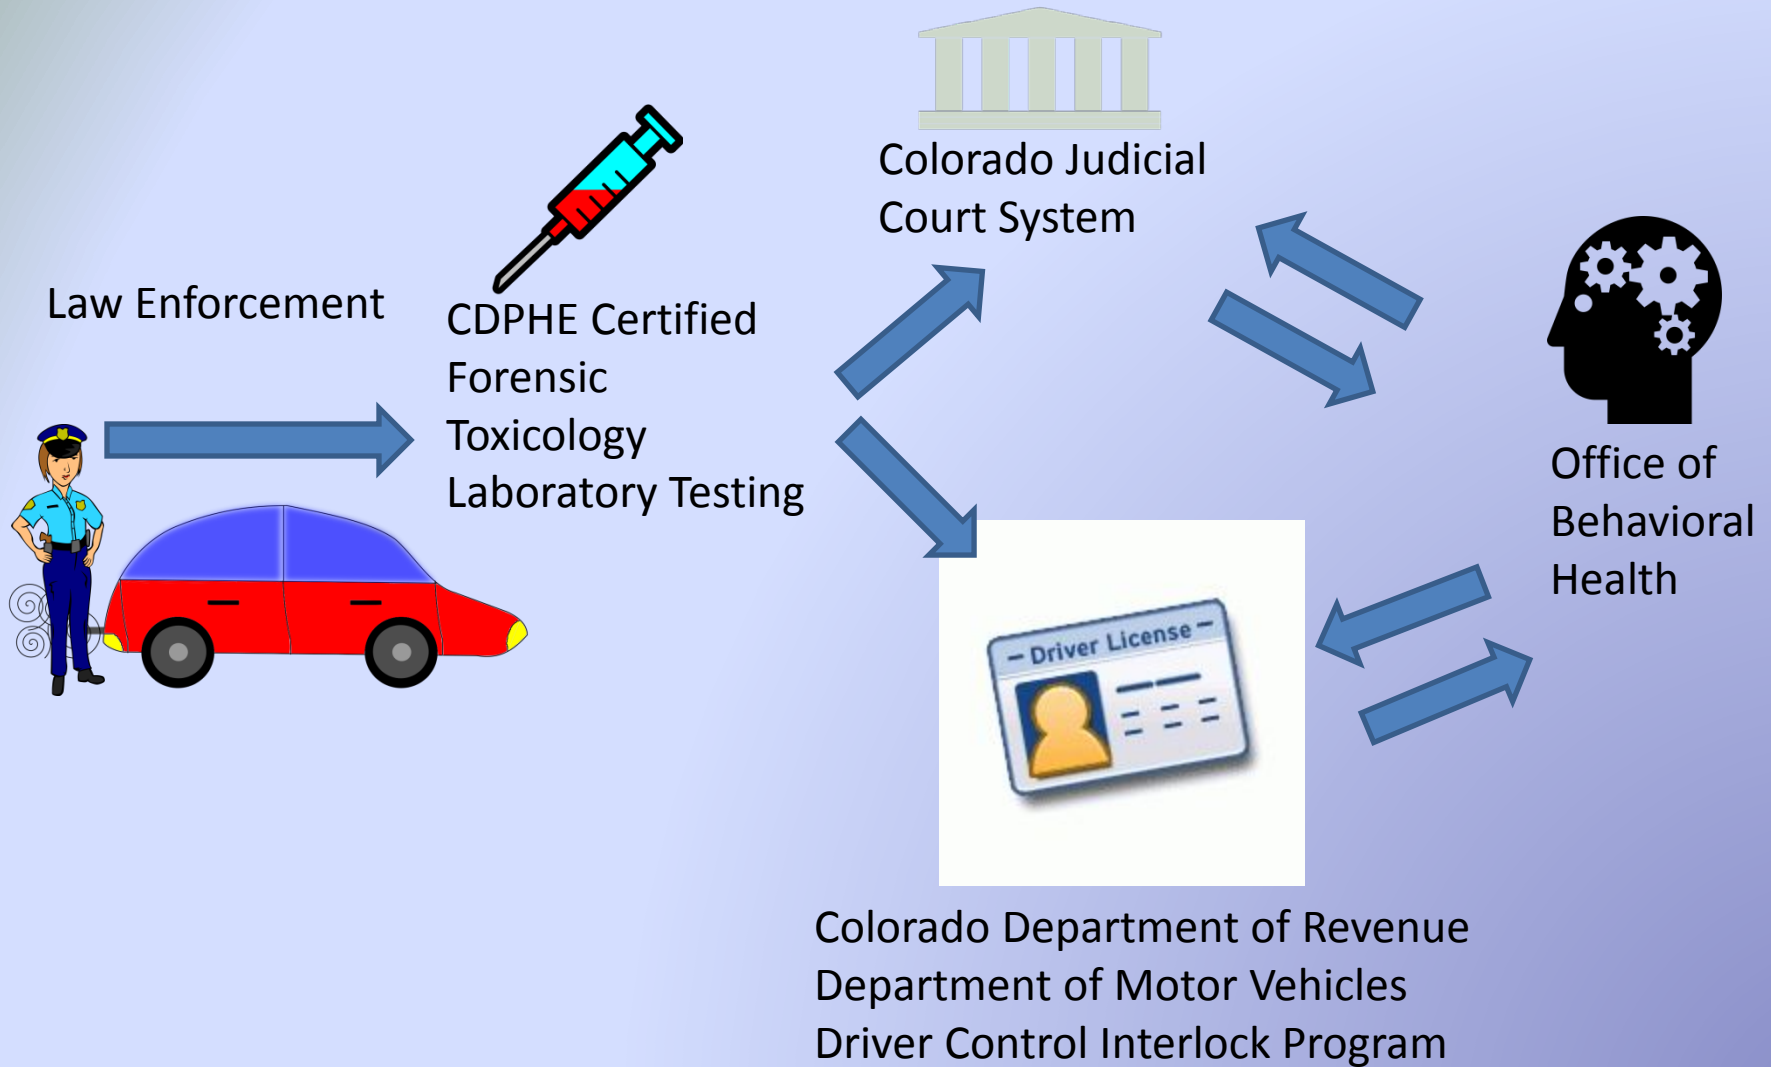

ADMISSION

1. SSPA:
  - a) Northeastern Colorado
  - b) Denver Area
  - c) Southern Half of Western Slope
2. Admission Date (mm/dd/yyyy)
3. Date of first contact (mm/dd/yyyy)
4. Last assessment date of record (mm/dd/yyyy)
5. Reason for admission:
  - a) Treatment Admission
  - b) Other Admission
6. Client/Provider license ID number
7. Provider/Client number
8. Referral number

CLIENT INFORMATION SECTION

9. Last Name
10. First Name
11. Middle Initial

# Case Lifespan Summary

# 4 - Recommendations

1. All Law Enforcement Officers trained and certified on ARIDE (roadside maneuvers).
2. All Law Enforcement Officers consistently use NIBERS to track all DUI/DUID citations issued.
3. Office of Behavioral Health (OBH) treatment providers enter a total of 6 additional fields of information into the TMS-ADDSCODS system.
4. Establish a common working analytical file that is updated from the TMS-ADDSCODS system and the NIBERS system on an ongoing basis that can be accessed by stakeholders.

# Problem Identification #1

1. Not all law enforcement officers are trained and certified on ARIDE (roadside maneuvers)
2. NHTSA requires officers are currently certified in SFST prior to being certified in ARIDE
3. NHTSA only requires a one-time certification in ARIDE.
4. SFST certification requires recertification every two-years.

# Recommendation #1

1. All Colorado Law Enforcement Officers who perform DUI/DUID enforcement be certified in ARIDE maneuvers.

# Problem Identification #2

1. NIBRS (National Incident Based Reporting System) is the federal database used by the Colorado Bureau of Investigation (CBI) to submit citation information.
2. NIBRS tracks the citations issued by law enforcement. Citations issued do not necessarily equate to the charges filed by the District Attorney.
3. NIBERS is not always consistently used by law enforcement for reporting DUI/DUID charges and is a federal database.

# Recommendation #2

1. All DUI/DUID citations issued by law enforcement officers are entered consistently into a centralized database maintained by CBI.
2. Extracts of those citations are downloaded on a consistent basis into a common working analytical file to be accessed by stakeholders.
3. Personal identifiers are not needed for this data extract.

# Problem Identification #3

1. Forensic Toxicology laboratory results are provided to the requesting law enforcement agency directly. These results are provided to the District Attorney and to DOR.
2. Results are not recorded by either the DA or DOR and cannot be easily tracked as each case is “silo-ed”.
3. Systems used to track individuals are either outdated or only not able to communicate with each other. There is no single or centralized database for DUI/DUID offenders.
4. All defendants are required to undergo evaluation by an OBH treatment provider regardless of the charges filed by both the courts and DOR.
5. OBH treatment providers receive the laboratory results.
6. OBH Providers report to both the courts/probation and to DOR the status of the treatment. (completion or failure to complete)

# Recommendation #3

1. OBH treatment providers receive the critical information needed to assess the data gaps identified by the ITFDID.
2. 6 Additional fields are need to be added to the TMS-ADDSCODS database used by OBH treatment providers to include:
  1. Time of Arrest (found of police report)
  2. Time of sample collection (found on lab report)
  3. Type of sample collected, eg. Blood, urine, saliva (found on lab report)
  4. Analyte(s) found in sample (found on lab report)
  5. Analyte(s) measured result (found on lab report)
  6. Number of prior offenses, if any.
3. OBH has the ability to add these fields to the current database.
4. Extracts of these data points are downloaded on a consistent basis into a common working analytical file to be accessed by stakeholders.
5. Personal identifiers are not needed for this data extract.

# Problem Identification #4

1. Lack of State database capacity
  - The state of Colorado currently does not have the capacity to answer comprehensive public health and public safety questions surrounding DUI/DUID prevalence rates.
2. Lack of efficient means to capture and analyze critical data in one central location.
  - To attain the evaluation goals, the state will need to link information from each agency for each case.

# Recommendation #4

1. Create a linked analytical file that is updated on an ongoing basis.
2. Extract data from the NIBERS and TMS-ADDSCODS databases.
3. Removal of personal identifying information.
4. Establish data sharing and publication guidelines.
5. Access to the data extracts by stakeholders for analysis.
6. OIT support to the data will be required.

# ITFDID Data Committee next steps

1. Partner with OBH treatment providers and executive staff.
2. Outline data schema for enhanced OBH database.
3. Partner with OIT officials to develop the shared analytical file.
4. Create data usage guidelines and recommendations.
5. Identify initial and potential ongoing costs.

# Conclusion

1. Currently, the data to help drive educational outreach and policy decisions is not being effectively captured and analyzed.
2. The TFDID Data Committee recognizes that there are many other valuable data points that would be useful, so additional recommendations will be likely moving forward.
3. The 4 recommendations being proposed are a great start for Colorado and will serve as the foundation for further study and future recommendations.

Thank You
