3 Scenic Byways: Best in Class

Travelers assume that all 26 of Colorado’s Scenic Highways pass through gorgeous landscapes. That is a correct assumption. In addition, visitors will find a regional cluster of three byways in Southern Colorado, each boasting extraordinary excellence in a second intrinsic asset.

For the Scenic Highway of Legends, it is geology including the radial dikes of the Spanish Peaks, the Dakota Sandstone Wall, and the K-Pg Boundary (think extinction of the dinosaurs). For the Silver Thread, it is a first-rate visitor experience that tells the stories of 3 charming historic mountain mining towns that sprung up during the US Silver Boom. For Los Caminos Antiguos, it is the cultural history of early Hispano settlement in Colorado.

Find five days to explore all three, or simply immerse yourself in one of these big nationally important themes—geology, history, or culture.

Day 1 – Scenic Highway of Legends

LUNCH:
Bob & Earl’s Cafe
Website >

Care for Colorado:

The SPMDTU building represents an important aspect of Hispano history. In the late nineteenth century, Hispano workers in the San Luis Valley faced segregation and were not allowed in white schools, hospitals, or restaurants. As a result, Hispano communities established mutual-aid societies to combat racial discrimination, to work for social and economic rights, to celebrate their culture, and to provide basic social insurance programs such as unemployment and burial aid. To contribute to the costs of preservation work on this important building, contact the Sangre de Cristo National Heritage Area @ [www.sangreheritage.org/spmdtu-to-be-restored](http://www.sangreheritage.org/spmdtu-to-be-restored)
